The 1988 Index to *Corrosion*

A guide to Volume 44, 1988

JANUARY

Theoretical Assessment of AC Impedance Spectroscopy for Detecting Corrosion of Rebar in Reinforced Concrete; *D. D. Macdonald, M. C. H. McKubre, M. Urquidi-Macdonald*....2

Corrosion of Metals by Nitric Acid-Dinitrogen Tetroxide-Fluoride Mixtures: AISI 321 Stainless Steel; *C. C. Addison, N. Logan, B. Mellor*....7

Hydrogen-Induced Cracking in FeSi Single Crystals; *Y-B. Wang, W-Y. Chu, C-M. Hsiao*....14

Effect of Cold Work on the Stress Corrosion Cracking of Nonsensitized AISI 304 Stainless Steel in High-Temperature Oxygenated Water; *J. Kuniya, I. Masaoka, R. Sasaki*....21

Pitting Corrosion of AISI 304 and 316 Austenitic Stainless Steels Covered with Anodic Oxide Films; *R. Nishimura, K. Kudo*....29

A Theory of the Corrosion of Substrates with Protective Metallic Coatings; *C. M. Egert*....36

Rotating Cylinder Electrode-Geometry Relationships for Prediction of Velocity-Sensitive Corrosion; *D. C. Silverman*....42

Stress Corrosion Cracking and Hydrogen-Induced Cracking in Austenitic Stainless Steel Under Mode II Loading; *L-J. Qiao, W-Y. Chu, C-M. Hsiao, J-D. Lu*....50

Experimental Determination of the Electrochemistry in Corrosion Fatigue Cracks in Structural Steel in Artificial Seawater; *A. Turnbull, A. S. Dolphin, F. A. Rackley*....55

Technical Note: Cathodic Polarization and Corrosion of Zn and ZnAl in 3% NaCl Solution; *W. J. Tomlinson, D. R. Breadsay*....62

News/Announcements....64

Corrosion Research Calendar....Inside Back Cover

FEBRUARY

Effects of Impurities on the IGSCC of Stainless Steel in High-Temperature Water; *L. G. Ljungberg, D. Cubicciotti, M. Trolle*....66

Study on SCC Susceptibility of Inconel X-750 in High-Temperature Pure Water: Effects of Aging Temperature and Time; *M. Tsubota, K. Hattori, T. Kaneko*....73

Stress Corrosion Cracking of Conventional and Super-Clean 3.5-NiCrMoV Rotor Steels in Simulated Condensates; *J. Rechberger, D. Tromans, A. Mitchell*....79

Electrochemical Prediction and Control of Localized Corrosion and SCC of Stainless Steels; *F. Mancia, A. Tamba*....88

Effect of Amplitude on Erosion-Corrosion of Metals by Vibratory Cavitation in Relation to pH of the Cavitation Media; *K. Ogino, A. Hide, S. Kishima*....97

Hydrogen Effect on Remaining Life of Hydroprocessing Reactors; *T. Iwadate, T. Nomura, J. Watanabe*....103

Stress Corrosion Cracking and Liquid Metal Embrittlement in Pure Magnesium; *S. P. Lynch, P. Trevena*....113

Technical Note: Hydrogen Induced IGSCC of Two Unsensitized Austenitic Stainless Steels in High-Temperature Water; *N. Totsuka, Z. Szklarska-Smialowska*....124

News/Announcements....127

Corrosion Research Calendar....Inside Back Cover

MARCH

Mars G. Fontana — A Corrosion Legacy....130

Conversion Electron Mossbauer Spectrometric Study of Corrosion Products of Iron Immersed in Sodium Chloride Solution; *K. Nomura, M. Tasaka, Y. Ujihira*....131

Corrosion Behavior of SUS 329J1 Stainless Steel in Formic Acid Solution; *I. Sekine, K. Momoi*....136

High-Temperature Polarization Behavior of Carbon Steel in Alkaline Sulfide Solution; *D. C. Crowe, D. Tromans*....142

A Model for the Kinetics of Repassivation II: Scratching Electrodes; *M. Barbosa*....149

Chemistry of Iron and its Corrosion Products in Boiler Systems; *W. E. Bornek*....154

Numerical Methods for the Determination of the Polarization Resistance in Corrosion Rate Monitoring and Inhibitor Testing; *G. Rocchini*....158

Simulation of the Crack Tip Chemistry of Stress Corrosion Cracks in 7XXX Aluminum Powder Alloys; *T. J. Langan, L. Christodoulou, D. Venables, J. A. S. Green, J. R. Pickens*....165

Precipitation-Hardened, Nickel-Base Alloys for Sour Gas Environments; *M. Igarashi, S. Mukai, T. Kudo, Y. Okada, A. Ikeda*.169

Influence of Strain on the Environmental Hydrogen-Assisted Cracking of a High-Strength Steel in Sodium Chloride Solution; *J. R. Scully, P. J. Moran*....176

Apparatus for Controlled Hydrodynamic Electrochemical and Corrosion Studies in High-Temperature Aqueous Systems; *D. D. Macdonald, J. Mankowski, M. Karaminezhead-Ranjbar, Y-H. Hu*....186

Corrosion Research Calendar....Inside Back Cover

APRIL

Crevice Corrosion Resistance of Stainless Steels in Natural Seawater in the Temperature Range of 25 to 40 C; *A. Mollica, A. Trevis, E. Traverso, G. Ventura, G. De Carolis, R. Dellepiane*....194

Localized Corrosion of Molybdenum-Bearing Nickel Alloys in Chloride Solutions; *J. Postlethwaite, R. J. Scoular, M. H. Dobbin*....199

Kinetic Studies on Segmented Tubular Stainless Steel Crevices at High Temperature; *D. F. Taylor, C. C. Foust*....204

Hydrogen Degradation of FeMnAl Alloys; *S-C. Chang, J-J. Chan*....209

On the Mechanism for Improved Passivation by Addition of Molybdenum to Austenitic Stainless Steels in O-Phosphoric Acid; *A. Guenbour, J. Faucheu, A. Ben Bachir*....214

Simultaneous Corrosion and Abrasion Measurements Under Grinding Conditions; *D. Kotlyar, C. H. Pitt, M. E. Wadsworth*....221

Technical Note: On the Effects of Magnesium on the Atmospheric Corrosion Resistance of Galvanized Sheet Steel; *H. E. Townsend*....229

Intercrystalline Corrosion and Stress Corrosion Cracking of AlZnMg Alloys; *M. Baumgartner, H. Kaesche*....231

Stress Corrosion Cracking of Inconel Alloys and Weldments in High-Temperature Water — The Effect of Sulfuric Acid Addition; *A. McMinn, R. A. Page*....239

Film Formation on Steel in Cinnamaldehyde-Inhibited Hydrochloric Acid; *F. B. Growcock, V. R. Lopp*....248

News/Announcements....255

Corrosion Research Calendar....Inside Back Cover

MAY

Mars G. Fontana — A Tribute....258

Effect of Molybdenum and Silicon on the Electrochemical Corrosion Behavior of FeNiB Metallic Glasses; *V. S. Raja, Kishore, S. Ranganathan*....263

Technical Note: Microbiologically Induced Increase in Corrosion Density of Stainless Steel Under Cathodic Protection; *B. Little, P. Wagner, D. Duquette*....270

Effect of the Nickel Content in the Pitting of Stainless Steels in Low Chloride and Thiosulfate Solutions; *R. Roberge*....274

Electrochemical Impedance Technique — A Practical Tool for Corrosion Prediction; *D. C. Silverman, J. E. Carrico*....280

Carbide Precipitation and SCC Behavior of Inconel Alloy 690; *J. M. Sarver, J. R. Crum, W. L. Mankins*....288

Stress Corrosion Cracking of Steel in High Temperature Water; *J. Congleton, R. N. Parkins*....290

Inhibition of Pitting Corrosion of AISI 304L Stainless Steel Surface by Surface Active Compounds; *D. W. DeBerry, A. Viehbeck*....299

The Effect of Nitrogen on the Localized Corrosion Resistance of Duplex Stainless Steel Simulated Weldments; *H. Tsuge, Y. Tarutani, T. Kudo*....305

Influence of Grain Boundary Microstructure on the Susceptibility of Alloy 600 to Intergranular Attack and Stress Corrosion Cracking; *S. M. Payne, P. McIntyre*....314

Corrosion Research Calendar....320

JUNE

Study of the Inhibitory Action of Nitrogen-Containing Compounds; *S. L. Granese*....322

Sensitization Development in Austenitic Stainless Steel: Correlation Between STEM-EDS and EPR; *S. M. Bruemmer, L. A. Charlot, B. W. Arey*....328

Concentrating Effects of Simulated Defects Under Boiling Conditions in High Temperature Water; *C. B. Ashmore, M. H. Hurdus, A. P. Mead, P. J. B. Silver, L. Tomlinson, D. J. Finnigan*....334

Effect of Organic Acids on the IGSCC of Sensitized AISI 304 Stainless Steel in High Temperature Aqueous Solutions; *T. Christman, G. Cragnolino*....345

Discussion on the Behavior of a Porous Anodic Film on Aluminum in H_3PO_4 Studied by Electrochemical Techniques; *A. A. Mazhar, F. El-Taib Heakal, A. S. Mogoda*....354

Technical Note: Localized Corrosion of Pure and Sulfur-Doped Nickel in Neutral Sodium Sulfate Solution; *Y. J. Kim, R. A. Oriani*....360

Grain Boundary Composition Effects on Environmentally Induced Cracking of Engineering Materials; *S. M. Bruemmer*....364

Experimental Evaluation of Cobalt Behavior on BWR Fuel Rod Surface; *H. Karasawa, Y. Asakura, M. Sakagami, S. Uchida*.371

Observation and Prediction of the Effects of Water Chemistry and Mechanics on Environmentally Assisted Cracking of Inconels 182 Weld Metal and 600; *P. L. Andresen*....376

Corrosion of Stainless Steel by Sulfate-Reducing Bacteria - Electrchemical Techniques;

The 1988 Index to *Corrosion*

A guide to Volume 44, 1988

JANUARY

Theoretical Assessment of AC Impedance Spectroscopy for Detecting Corrosion of Rebar in Reinforced Concrete; *D. D. Macdonald, M. C. H. McKubre, M. Urquidi-Macdonald*....2

Corrosion of Metals by Nitric Acid-Dinitrogen Tetroxide-Fluoride Mixtures: AISI 321 Stainless Steel; *C. C. Addison, N. Logan, B. Mellor*....7

Hydrogen-Induced Cracking in FeSi Single Crystals; *Y-B. Wang, W-Y. Chu, C-M. Hsiao*....14

Effect of Cold Work on the Stress Corrosion Cracking of Nonsensitized AISI 304 Stainless Steel in High-Temperature Oxygenated Water; *J. Kuniya, I. Masaoka, R. Sasaki*....21

Pitting Corrosion of AISI 304 and 316 Austenitic Stainless Steels Covered with Anodic Oxide Films; *R. Nishimura, K. Kudo*....29

A Theory of the Corrosion of Substrates with Protective Metallic Coatings; *C. M. Egert*....36

Rotating Cylinder Electrode-Geometry Relationships for Prediction of Velocity-Sensitive Corrosion; *D. C. Silverman*....42

Stress Corrosion Cracking and Hydrogen-Induced Cracking in Austenitic Stainless Steel Under Mode II Loading; *L-J. Qiao, W-Y. Chu, C-M. Hsiao, J-D. Lu*....50

Experimental Determination of the Electrochemistry in Corrosion Fatigue Cracks in Structural Steel in Artificial Seawater; *A. Turnbull, A. S. Dolphin, F. A. Rackley*....55

Technical Note: Cathodic Polarization and Corrosion of Zn and ZnAl in 3% NaCl Solution; *W. J. Tomlinson, D. R. Breadsay*....62

Mars G. Fontana — A Tribute....258

Effect of Molybdenum and Silicon on the Electrochemical Corrosion Behavior of FeNiB Metallic Glasses; *V. S. Raja, Kishore, S. Ranganathan*....263

Technical Note: Microbiologically Induced Increase in Corrosion Density of Stainless Steel Under Cathodic Protection; *B. Little, P. Wagner, D. Duquette*....270

Effect of the Nickel Content in the Pitting of Stainless Steels in Low Chloride and Thiosulfate Solutions; *R. Roberge*....274

Electrochemical Impedance Technique — A Practical Tool for Corrosion Prediction; *D. C. Silverman, J. E. Carrico*....280

Carbide Precipitation and SCC Behavior of Inconel Alloy 690; *J. M. Sarver, J. R. Crum, W. L. Mankins*....288

Stress Corrosion Cracking of Steel in High Temperature Water; *J. Congleton, R. N. Parkins*....290

Inhibition of Pitting Corrosion of AISI 304L Stainless Steel Surface by Surface Active Compounds; *D. W. DeBerry, A. Viehbeck*....299

The Effect of Nitrogen on the Localized Corrosion Resistance of Duplex Stainless Steel Simulated Weldments; *H. Tsuge, Y. Tarutani, T. Kudo*....305

Influence of Grain Boundary Microstructure on the Susceptibility of Alloy 600 to Intergranular Attack and Stress Corrosion Cracking; *S. M. Payne, P. McIntyre*....314

Corrosion Research Calendar....320

JUNE

Study of the Inhibitory Action of Nitrogen-Containing Compounds; *S. L. Granese*....322

Sensitization Development in Austenitic Stainless Steel: Correlation Between STEM-EDS and EPR; *S. M. Bruemmer, L. A. Charlot, B. W. Arey*....328

Concentrating Effects of Simulated Defects Under Boiling Conditions in High Temperature Water; *C. B. Ashmore, M. H. Hurdus, A. P. Mead, P. J. B. Silver, L. Tomlinson, D. J. Finnigan*....334

Effect of Organic Acids on the IGSCC of Sensitized AISI 304 Stainless Steel in High Temperature Aqueous Solutions; *T. Christman, G. Cragnolino*....345

Discussion on the Behavior of a Porous Anodic Film on Aluminum in H_3PO_4 Studied by Electrochemical Techniques; *A. A. Mazhar, F. El-Taib Heakal, A. S. Mogoda*....354

Technical Note: Localized Corrosion of Pure and Sulfur-Doped Nickel in Neutral Sodium Sulfate Solution; *Y. J. Kim, R. A. Oriani*....360

Grain Boundary Composition Effects on Environmentally Induced Cracking of Engineering Materials; *S. M. Bruemmer*....364

Experimental Evaluation of Cobalt Behavior on BWR Fuel Rod Surface; *H. Karasawa, Y. Asakura, M. Sakagami, S. Uchida*.371

Observation and Prediction of the Effects of Water Chemistry and Mechanics on Environmentally Assisted Cracking of Inconels 182 Weld Metal and 600; *P. L. Andresen*....376

Corrosion of Stainless Steel by Sulfate-Reducing Bacteria - Electrchemical Techniques;

C. Ringas, F. P. A. Robinson.....386
Performance and Service Life of Low-Slump-Concrete Bridge Deck Overlays in New York State;
W. P. Chamberlin.....397
Localized Corrosion Behavior of Nickel Alloys in Model SO_2 Scrubber Environments;
E. L. Hibner, R. W. Ross, Jr......404
Corrosion Research Calendar.....Inside Back Cover

JULY

The Effect of Alkaline-Etch Pretreatment on the Pitting Corrosion of Wrought Aluminum;
O. Lunder, K. Nisancioglu.....414
Technical Note: Assessment of Corrosion and Microfouling of Several Metals in Polluted Seawater;
H. A. Videla, M. F. L. de Mele, G. Brankevich.....423
Sensitization Development in Austenitic Stainless Steel - Measurement and Prediction of Thermomechanical History Effects;
S. M. Bruemmer, L. A. Charlot, D. G. Atteridge....427
Stress Corrosion Cracking Behavior of Tungsten Heavy Alloys in Sodium Chloride Solution;
J-G. Chung, D. J. Duquette.....435
Effect of Low Concentrations of Hydrogen Sulfide in Seawater on Fatigue Crack Growth in a CMn Structural Steel;
M. Assefpour-Dezfuly, W. G. Ferguson.....443
Environmentally Assisted Growth Rate Response of Nonsensitized AISI 316 Grade Stainless Steels in High Temperature Water;
P. L. Andresen.....450
Studies of Metal-Oxygen Bonds on 18%-Cr Stainless Steel in the Passive and Transpassive Regions by Integrated and Angle-Resolved X-Ray Photoelectron Spectroscopies;
M. Ben-Haim, U. Atzmony, N. Shamir.....461
Technical Note: Chemical Etching to Reveal Phosphorus Distribution During Tempering of AISI 4130 Steel;
B. D. Craig.....465
Corrosion of Carbon Steel in Phenol Solutions Containing Amine Hydrochlorides: Impressed Current, Fluid Motion, and Concentration Effects;
W. Wozniak, A. A. Sagues, B. H. Davis.....468
Two-Year Results of Long-Term, Copper-Nickel Sheathed Piling Studies;
D. G. Melton.....478
Infrared Spectroscopic Analysis of Phase Transformation Processes in Rust Layers Formed on Weathering Steels in Bridge Spans;
A. Raman, B. Kuban.....483
Pore Solution Composition and Chloride Effects on the Corrosion of Steel in Concrete;
T. Yonezawa, V. Ashworth, R. P. M. Procter.....489
Corrosion Research Calendar.....500

AUGUST

Galvanic Corrosion Behavior of Depleted Uranium in Synthetic Seawater Coupled to Aluminum, Magnesium, and Mild Steel;
J. F. McIntyre, E. P. Lefeave, K. A. Musselman...502
Effect of Heat Input and Microstructure on Pitting Corrosion in AISI 316L Submerged Arc Welds;
T. P. S. Gill, U. Kamachi Mudali, V. Seetharaman, J. B. Gnanamoorthy.....511
The Role of Crevice Corrosion in the Stress Corrosion Cracking of Fe-29Ni-17Co;
W. R. Cieslak.....517
Stress Corrosion Cracking Behavior of AlLi Alloy 8090;
J. B. Lumsden, A. T. Allen.....527
Utilization of the Specific Pseudocapacitance for Determination of the Area of Corroding Steel Surfaces;
J. N. Murray, P. J. Moran, E. Gileadi.....533
Accelerating Effect and Critical pH Value of Occluded Cell Corrosion Within Pits, Crevices, or Stress Corrosion Cracks;
J. Zuo, Z. Jin, R. Sun, Y. Xu, X. Feng.....539
Behavior of Selected Commercial Alloys During High Temperature Oxychloridation;
P. Elliott, A. A. Ansari, R. Prescott, M. F. Rothman.....544
Technical Note: Equivalent Circuits Representing the Impedance of a Corroding Interface;
A. A. Sagues.....555
Technical Note: Concerning the Display of Impedance Data;
F. Mansfeld.....558
Stress Corrosion Cracking of Sensitized AISI 304 Stainless Steel in Aqueous Chloride Solutions Containing Sulfur Species at 50 through 200 C;
J. K. Lee, Z. Szklarska-Smialowska.....560
The Effectiveness of Nitrite-Based and Total Organic Formulations in Preventing Corrosion on Precorroded Mild Steel Surfaces;
A. Marshall, C. Wederell.....566
Hydrogen Gas Evolution from Cathodically Protected Pipeline Steel Surfaces Exposed to Chloride-Sulfate Solutions;
R. N. Parkins, A. J. Markworth, J. H. Holbrook.....572
Monitoring Cathodically Protected Steel in Concrete Structures with Electrochemical Impedance Techniques;
N. G. Thompson, K. M. Lawson, J. A. Beavers....581
Corrosion Research Calendar.....Inside Back Cover

SEPTEMBER

α-Alkenylphenones - A New Class of Acid Corrosion Inhibitors;
W. W. Frenier, F. B. Growcock, V. R. Lopp.....590
Various Electrochemical Measurements in a Simulated Corrosion Fatigue Crack;
E. A. Charles, J. Congleton, R. N. Parkins.....599
Incorporation of Organic Complexing Agents in Electromotive Force-pH Diagrams;
D. C. Silverman.....606
Effect of Nitrogen Implantation on the Oxidation Behavior of AISI 316 Stainless Steel;
H. Hong, W. B. Carter, R. F. Hochman.....611
Effects of Temperature and Magnesium Ions on Calcareous Deposition;
S-H. Lin, S. C. Dexter.....615
Characterization of Crack Tip Electrochemistry Using a Simulated Crack;
R. A. Page, A. McMinn, S. J. Hudak, Jr......623
Intergranular Attack Observed in Radiation-Enhanced Corrosion of Mild Steel;
R. J. Rede, S. L. A. Hana, J. L. Kelly.....632
Corrosion of AA 7075 Aluminum Alloy in Media Contaminated with *Cladosporium resinae*;
E. S. Ayllon, B. M. Rosales.....638
Modeling the Failure of Electronic Devices by Dendrite Growth in Bulk and Thin Layer Electrolytes;
S. L. Meilink, M. Zamanzadeh, G. W. Warren, P. Wynblatt.....644
Evaluation of Alloy Anodes for Aluminum-Air Batteries: Corrosion Studies;
D. D. Macdonald, K. H. Lee, A. Moccari, D. Harrington.....652
Electrochemical Corrosion Probe for High Resistivity Hydrocarbon/Water Mixtures;
R. Jasinski, K. D. Efird.....658
Effect of Molybdenum Additions on the Corrosion Resistance of a 12% Chromium Steel;
M. A. A. Tullmin, F. P. A. Robinson.....664
Corrosion of Stainless Steel by Sulfate-Reducing Bacteria - Total Immersion Test Results;
C. Ringas, F. P. A. Robinson.....671

OCTOBER

Influence of Processing Variables on the Corrosion Susceptibility of Metal-Matrix Composites;
R. C. Paciej, V. S. Agarwala.....680
Environmentally Assisted Fracture of Aluminum Alloys;
R. Hermann.....685
Zinc Passivation in Oxalate Solution;
M. M. Hefny, A. G. Gad-Allah, S. A. Salih, M. S. El-Basiouny.....691
Technical Note: Effect of Hydrogen on the Pitting Resistance of Passivating Film on Nickel in Chloride-Containing Solution;
M. E. Armacanqui, R. A. Oriani.....696
Influence of Silicon on the Intergranular Corrosion Behavior of 18Cr-8Ni Stainless Steels;
B. E. Wilde.....699
Anodic Behavior of Titanium in Aqueous Media;
A. A. Mazhar, F. El-Taib Heakal, A. G. Gad-Allah.705
Influence of Silicon on the Corrosion Characteristics of 18Cr-8Ni Type Stainless Steel in Dilute Sulfuric Acid;
B. E. Wilde.....711
Effect of Seawater Biofilms on Corrosion Potential and Oxygen Reduction of Stainless Steel;
S. C. Dexter, G. Y. Gao.....717
Hot Corrosion of Iron in Molten Sulfate;
H. Numata.....724
Effects of Cl^- Concentration and Temperature on Pitting of AISI 304 Stainless Steel;
J-H. Wang, C. C. Su, Z. Szklarska-Smialowska....732
Effect of Environmental Factors on Hydrogen Permeation in Line Pipe Steel;
M. Kimura, N. Totsuka, T. Kurisu, T. Hane, Y. Nakai.738
Factors Affecting the Stress Corrosion Cracking Susceptibility of Zirconium in 90% Nitric Acid;
T. L. Yau.....745
Corrosion in Fresh Water Systems: Transient Monitoring Technique for Corrosion;
N. A. I. Ahmad, R. S. Al-Ameeri, M. I. Ismail.....750
Influence of Load Line Displacement on Stress Corrosion Crack Growth Behavior of AISI 422 Stainless Steel in NaCl Solution;
S. M. Cheruvu.....755
On-Site Determination of the Polarization Resistance in a Reinforced Concrete Beam;
S. Feliu, J. A. Gonzalez, C. Andrade, V. Feliu.....761

NOVEMBER

Electrodissolution of Copper in NaCl Solution: Influence of the Sample Holder's Shape;
J. Crousier, J-P. Crousier.....768
Stress Corrosion Cracking of Steels in Coal Gas Liquid;
E. Sato, T. Murata.....770
Review of Nickel's Role in Sulfide Stress Cracking of Low Alloy Steels;
B. D. Craig.....776
Microstructure and Microdeformation Effects on IGSCC of Alloy 600 Steam Generator Tubing;
S. M. Bruemmer, L. A. Charlot, C. H. Heneger, Jr..782
Technical Note: The Need for Caution in the Use of Cyclic Voltammetry for Predicting Iron Corrosion Behavior;
B. MacDougall, J. A. Bardwell.....789
Effect of Temperature and Ionic Impurities at Very Low Concentrations on Stress Corrosion Cracking of AISI 304 Stainless Steel;
W. E. Ruther, W. K. Soppet, T. F. Kassner.....791
CO_2 Corrosion of Carbon Steel and 13Cr Steel in Particle-Laden Fluid;
U. Lotz, T. Sydberger.....800
Electrochemical and Corrosion Fatigue Behavior of FeAlMn Alloys in NaCl Solution;
J-B. Duh, W-T. Tsai, J-T. Lee.....810
Influence of Galvanically Decoupled Monel 400 Alloy on the Protective Magnetite Film Formation on Carbon Steel in the Presence and Absence of EDTA;
G. Venkateswaran, K. S. Venkateswarlu.....818
Development of a Time-Temperature Transformation Diagram for Alloy 925;
P. Ganesan, E. F. Clatworthy, J. A. Harris.....827
Technical Note: Estimation of Corrosive Wear of Grinding Media by Electrochemical Measurements;
J. W. Jang, R. L. Pozzo, I. Iwasaki.....837
Microstructural Role in Environmentally Assisted Cracking of Ni-Base Alloys;
K. Hosoya, R. Ballinger, J. Prybylowski, I. S. Hwang.838
Corrosion Research Calender.....854

DECEMBER

1988 Whitney Award Lecture — Don't Be Afraid of Electrochemical Techniques — But Use Them with Care!;
F. Mansfeld.....856
Analysis of Carbon Steels Affected by Bacteria Using Electrochemical Impedance and Direct Current Techniques;
N. J. E. Dowling, J. Guezennec, M. L. Lemoine, A. Tunlid, D. C. White.....869
Pourbaix Diagrams for Mixed Metal Oxides — Chemistry of Copper in BWR Water;
D. Cubicciotti.....875
Effects of Sulfur and Phosphorous Dopants on Aqueous Corrosion of Sensitized AISI 304 Stainless Steel;
S. Danyluk, J. M. Chynoweth.....881
Influence of Cathodic Protection Parameters on Calcareous Deposit Formation;
R. U. Lee, J. R. Ambrose.....887
Crevice Corrosion of Nickel-Based Alloys in Neutral Chloride and Thiosulfate Solutions;
S. J. Mulford, D. Tromans.....891
Measurement of Steel and Aluminum Corrosion Rates Using the Galvanic Couple Method;
B. Tsujino, T. Oki.....900
Corrosion Fatigue Behavior of Alloy 600 in High-Salinity Brine;
H. M. Shalaby, P. Zhao, G. Cragnolino, D. D. Macdonald.....905
Corrosion of Alloy Steels in Oil Field Fluids;
R. L. Martin.....916
Slow Strain Rate Testing for Materials Evaluation in High-Pressure H_2S Environments;
D. R. McIntyre, R. D. Kane, S. M. Wilhelm.....920
Analysis of Potential and Current Distributions Using a Boundary Element Method;
S. Aoki, K. Kishimoto, M. Miyasaka.....926
Stress Corrosion Characteristics of AlCuLi AA 2090 Alloy;
R. C. Dorward, K. R. Hasse.....932
1988 Corrosion Index.....942

1988 Author Index

[Note: Issue number is followed by the page number; e.g., "Addison, C. C., 1-7" indicates that an article by C. C. Addison can be found in Issue No. 1 (January), Page 7.]

1988 Subject Index

[Note: Issue number is followed by the page number; e.g., "Bacterial Influence on Cathodically Protected SS, 5-270" indicates that an article on bacterial influence on cathodically protected stainless steel can be found in Issue No. 5 (May), Page 270.]

ABRASION
Electrochemical Estimation — Grinding Media, 11-837
Measuring Erosion-Corrosion under Grinding, 4-221
N Implantation vs Oxidation AISI 316, 9-611
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

ABRASION EROSION, TESTING
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

ABRASION-RESISTANT STEELS
Electrochemical Estimation — Grinding Media, 11-837

ACCELERATED LAB TESTING
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Mo-Alloying Influence on 12% Cr Steel, 9-664
P Distribution During Tempering of AISI 4130 Steel, 7-465

ACETIC ACIDS, CAUSES
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Bacterial Influence on Cathodically Protected SS, 5-270
Incorporating Organic Agents in Diagrams, 9-606
Mo-Alloying Influence on 12% Cr Steel, 9-664
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

ACID SURFACE PREPARATION
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

ACIDIFICATION
Defect Concentration Effects in Hot H_2O, 6-334
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Ni Influence on HSC of Low-Alloy Steels, 11-776

ACIDS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
AC Impedance Prediction of Corrosion Rate, 5-280
AISI 304 IGSCC in Hot H_2O with Organic Acids, Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-466
Grain Boundary Influence on IGSCC, 6-364
Impedance, DC Tests of Bacterial Attack, 12-869
Incorporating Organic Agents in Diagrams, 9-606 6-345

ACTIVATION, ELECTROCHEMICAL
Strauss Test Results on P, S-Doped 304SS, 12-881

ADHESION
Cl Concentration Influence on Steel in Concrete, 7-489

ADSORPTION
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
α-Alkenylphenone Inhibitor Properties, 9-590
Cinnamaldehyde Films on Steel vs HCl, 4-248
Co Behavior on BWR Fuel Rod Surfaces, 6-371
Electrochemical Study of H_3PO_4 Films on Al, 6-354
H Absorption — High-Strength Steel in NaCl, 3-176
Mg SCC, Liquid Metal Embrittlement, 2-113
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Surfactants vs AISI 304L Pitting, 5-299

AERATION
Corroding Area Calculated by Pseudocapacitance, 8-533
SCC — Sensitized SS in $H_2O + Cl + S$, 50 to 200 C, 8-560

AEROBIC, MICROORGANISMS
Bacterial Influence on Cathodically Protected SS, 5-270
Impedance, DC Test of Bacterial Attack, 12-869
SS Crevice Attack in 25 to 40 C Seawater, 4-194

AGING
Microstructure Influence on Ni Alloy Cracking, 11-838
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169

AIR
Mg SCC, Liquid Metal Embrittlement, 2-113
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

ALDEHYDE INHIBITORS
Cinnamaldehyde Films on Steel vs HCl, 4-248

ALKALIS, AQUEOUS
Defect Concentration Effects in Hot H_2O, 6-334
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
Surface Pretreatment of Al Influence on Pits, 7-414

ALKALIS AND SALTS, CAUSES
Alloy 600 Grain Margin Influence on IGSCC 5-314
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Mg SCC, Liquid Metal Embrittlement, 2-113

ALKALIZATION, EFFECTS
pH, Potential of Steel Cracks in Seawater, 1- 55

ALLOYING EFFECTS
Austenitic SS Sensitization Measurement Prediction, 7-427
Crevice Attack on Ni-Base Alloys in Cl, S, 12-881
Strauss Test Results on P, S-Doped 304 SS, 12-881
Surface Pretreatment of Al Influence on Pits, 7-414

ALTERNATING CURRENT
Rebar Corrosion Evaluation by Spectroscopy, 1- 2

ALUMINUM
Al Alloy Air Battery Corrosion Studies, 9-652
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Boundary Element Analysis of Potential Current D, 12-926
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
DC Pulse Measurement of Fresh Water Systems, 10-750
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Galvanic Cell Measurement of Al, Steel A, 12-900
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Hydrogen Degradation of FeMnAl Alloys, 4-209
IGSCC AlZnMg Alloys, 4-231
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Processing Methods Influence on SiCAl Composites, 10-880
SCC Al-Li Alloy 8090 in NaCl, 8-527
Surface Pretreatment of Al Influence on Pits, 7-414
Variables' Influence on Electrochemical Tests, 12-856
Vibratory Amp Influence on Erosion-Corrosion, 2- 97
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

ALUMINUM ANODES
CuNi Piling Sheaths—Two-Year Study Results, 7-478

ALUMINUM COATINGS
Metal Coating Defects vs Base Metal Attack, 1- 36

AMINES
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468

AMMONIA
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Defect Concentration Effects in Hot H_2O, 6-334
SCC Inconel Welds in High-Temperature $H_2O+H_2SO_4$, 4-239

AMMONIUM SALTS
Defect Concentration Effects in Hot H_2O, 6-334

ANAEROBIC MICROORGANISMS
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
H_2S in Seawater vs CMn Structural Steel, 7-443
Impedance, DC Tests of Bacterial Attack, 12-869
SS Crevice Attack in 25 to 40 C Seawater, 4-194
Sulfate-Reducing Bacteria vs SS, 9-671

ANIONIC CAUSES & EFFECTS
Electrochemical Study of H_3PO_4 Films on Al, 6-354
IGSCC AlZnMg Alloys, 4-231
Variables' Influence on Electrochemical Tests, 12-856

ANNEALING
Alloy 600 Fatigue in High-Salinity Brine, 12-856
Alloy 600 Grain Margin Influence on IGSCC 5-314
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699

ANODES, GALVANIC
CuNi Piling Sheaths—Two-Year Study Results, 7-478

ANODIC POTENTIAL TESTS
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

ANODIC PROTECTION
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
SS Localized, SCC Attack Prediction Control, 2- 88

ANODIZED CONVERSION COATINGS
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Variables' Influence on Electrochemical Tests, 12-856

AQUEOUS ENVIRONMENTS
Anodic Behavior of Ti in Aqueous Solution, 10-705
Galvanic Cell Measurement of Al, Steel A, 12-900
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Impedance, DC Test on Bacterial Attack, 12-869
Incorporating Organic Agents in Diagrams, 9-606
Mg SCC, Liquid Metal Embrittlement, 2-113
Microstructure Influence on Ni Alloy Cracking, 11-838
SCC — Sensitized SS in $H_2O+Cl+S$, 50 to 200 C, 8-550

AREA EFFECT, GALVANIC CELLS
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502

ASHES
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

ATMOSPHERIC
Mg Influence on Atmosphere Attack on Galvanic Steel, 4-229
Variables' Influence on Electrchemical Tests, 12-856
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483
1988 Whitney Award Lecture — Don't Be Afraid of Electrochemical Techniques — But Use Them with Care!, 12-850

ATOMIC CAUSES & EFFECTS
CrNi Steel vs Formic Acid, 3-136
Mg SCC, Liquid Metal Embrittlement, 2-113
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

AUTOMOTIVE INDUSTRIES
Al Alloy Air Battery Corrosion Studies, 9-652

BERYLLIUM
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7

BIMETAL POURBAIX DIAGRAMS
Cu, Fe, CuFe + H_2 Oxides Precipitates in BWR Reactor, 12-875

BIOGRAPHIES
Mars G. Fontana Short Biography, 3-130
Mars G. Fontana Tribute, 4-258

BIOLOGICAL EFFECTS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
Bacterial Influence on Cathodically Protected SS, 5-270
Biofilm Effects on SS Corrosion in Seawater, 10-717
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
H_2S in Seawater vs CMn Structural Steel, 7-443
Impedance, DC Tests of Bacterial Attack, 12-869
Microfouling of Metals in Polluted Seawater, 7-423
SS Crevice Attack in 25 to 40 C Seawater, 4-194
Sulfate-Reducing Bacteria vs SS, 9-671

BLISTERING OF MATERIALS, NOT COATINGS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638

BOILERS
Fe Corrosion Chemistry in Boiler System, 3-154
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782

BORIC ACID
H Induced Cracking of SS in High-Temperature Water, 2-124

BORON
Microstructure Influence on Ni Alloy Cracking, 11-838

BOUNDARY ELEMENT MODELING
Boundary Element Analysis of Potential Current, 12-926

BRASS
Microfouling of Metals in Polluted Seawater, 7-423

BRIDGES
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

BROMINE
Electrochemical Study of H_3PO_4 Films on Al, 6-354

CABLES, ELECTRICAL
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517

CALCAREOUS DEPOSITS
Bacterial Influence on Cathodically Protected SS, 5-270
Cathodic Protection Parameters Influences on Calcareous Deposits, 12-887
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

CALCIUM
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738

CALCIUM CHLORIDE
On-Site Polarization Tests of Steel in Concrete, 10-761

CALCIUM HYDROXIDE
Cl Concentration Influence on Steel in Concrete, 7-489

CALCULATIONS
AC Impedance Prediction of Corrosion Rate, 5-280
Computer Analysis of Polarization Rate Tests, 3-158
Corroding Area Calculated by Pseudocapacitance, 8-533
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
Equivalent Circuits — Impedance of Interface, 8-555
Incorporating Organic Agents in Diagrams, 9-606
On-Site Polarization Tests of Steel in Concrete, 10-761
Rebar Corrosion Evaluation by Spectroscopy, 1- 2
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
Scratching Electrodes Repassivation Kinetics, 3-149
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

CAPACITANCE TESTS
Corroding Area Calculated by Pseudocapacitance, 8-533
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Surfactants vs AISI 304L Pitting, 5-299

CARBIDES
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Austenitic SS Sensitization Measurement Prediction, 7-427
Grain Boundary Influence on IGSCC, 6-364
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
N Influence on Duplex Steel Simulated Weldments, 5-305
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
Strauss Test Results on P, S-Doped 304 SS, 12-881
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

CARBON
Austenitic SS Sensitization Measurement Prediction, 7-427
Ni Influence on HSC of Low-Alloy Steels, 11-776
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
Strauss Test Results on P, S-Doped 304 SS, 12-881

CARBON DIOXIDE
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
Oilfield Fluids vs Alloy Steels, 12-916
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SCC of Rotor Steels in Simulated Condensers, 2- 79

CARBON MONOXIDE
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345

CARBON STEEL
AC Impedance Prediction of Corrosion Rate, 5-280
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
α-Alkenylphenone Inhibitor Properties, 9-590
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Corroding Area Calculated by Pseudocapacitance, 8-533
CuNi Piling Sheaths—Two-Year Study Results, 7-478

DC Pulse Measurement of Fresh Water Systems, 10-750
Electrochemical Estimation — Grinding Media, 11-837
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Galvanic Cell Measurement of Al, Steel A, 12-900
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Grain Boundary Influence on IGSCC, 6-364
H Attack on Hydroprocessors vs Time, 2-103
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
H_2S in Seawater vs CMn Structural Steel, 7-443
Impedance, DC Tests of Bacterial Attack, 12-869
Measuring Erosion-Corrosion under Grinding, 4-221
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Oilfield Fluids vs Alloy Steels, 12-916
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
pH, Potential of Steel Cracks in Seawater, 1- 55
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Radiation Influence on Steel IGA, 9-632
SCC in 182 Welds in 600 vs 288 C $H_2O + O_2$, 6-376
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
SCC of Steel in High-Temperature Water, 5-290
Sulfate-Reducing Bacteria vs SS, 9-671
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Variables' Influence on Electrochemical Tests, 12-856
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

CARBONATE BASES AND SALTS
Oilfield Fluids vs Alloy Steels, 12-916

CASE HISTORIES
AC Impedance Prediction of Corrosion Rate, 5-280

CAST IRON
Boundary Element Analysis of Potential Current D, 12-926
DC Pulse Measurement of Fresh Water Systems, 10-750

CATHODIC POTENTIAL TESTS
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

CATHODIC PROTECTION
Bacterial Influence on Cathodically Protected SS, 5-270
Biofilm Effects on SS Corrosion in Seawater, 10-717
Boundary Element Analysis of Potential Current D, 12-926
Cathodic Protection Parameters Influence on Calcareous Deposits, 12-887
Coal Gas Liquirl SCC — Mild, Low-Alloy Steel, 11-770
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
H Absorption — High-Strengtl: Steel in NaCl, 3-176
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Ni Influence on HSC of Low-Alloy Steels, 11-776
pH, Potential of Steel Cracks in Seawater, 1- 55
SS Localized, SCC Attack Prediction Control, 2- 88
Zr Susceptibility to SCC in 9% HNO_3, 10-745

CATIONIC EFFECTS
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

CAVITATION
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

CESIUM
Mg SCC, Liquid Metal Embrittlement, 2-113
SS Crevice Attack in 25 to 40 C Seawater, 4-194

CHELATION
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Surfactants vs AISI 304L Pitting, 5-299

CHEMICAL DEPOSITION
Metal Coating Defects vs Base Metal Attack, 1- 36

CHEMICAL OR ELECTROCHEMICAL TESTING
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
α-Alkenylphenone Inhibitor Properties, 9-590
Biofilm Effects on SS Corrosion in Seawater, 10-717
Characterization of Crack Tip Electrochemistry, 9-623
Cl Concentration Influence on Steel in Concrete, 7-489
Computer Analysis of Polarization Rate Tests, 3-158
DC Pulse Measurement of Fresh Water Systems, 10-750
Electrochemical Estimation — Grinding Media, 11-837
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-656
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Fatigue Crack Electrochemical Measurement, 9-599
H Influence on Pitting of Passive Ni in Cl, 10-696
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Impedance Data Display, 8-556
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo-Alloying Influence on 12% Cr Steel, 9-664
Ni Influence on HSC of Low-Alloy Steels, 11-776
P Distribution During Tempering of AISI 4130 Steel, 7-465
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Processing Methods Influence on SiCAl Composites, 10-680
Si's Influence on Intergranular Attack on 18-8 SS, 10-699
Sulfate-Reducing Bacteria vs SS, 9-671
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Variables' Influence on Electrchemical Tests, 12-856
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

CHEMICAL OR ELECTROCHEMICAL, LAB TESTING
Variables' Influence on Electrochemical Tests, 12-856

CHEMICAL SURFACE PREPARATION
Surface Pretreatment of Al Influence on Pits, 7-414

CHEMISORPTION
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322

CHLORIC ACID
Anodic Behavior of Ti in Aqueous Solution, 10-705

CHLORIDES
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Cl Concentration Influence on Steel in Concrete, 7-489
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Defect Concentration Effects in Hot H_2O, 6-334
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
Fatigue Crack Electrochemical Measurement, 9-599
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Fe Corrosion Chemistry in Boiler System, 3-154
Microfouling of Metals in Polluted Seawater, 7-423
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Oilfield Fluids vs Alloy Steels, 12-916
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Processing Methods Influence on SiCAl Composites, 10-680
Radiation Influence on Steel IGA, 9-632
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC — Sensitized SS in H_2O + Cl + S, 50 to 200 C, 8-560
Slow Strain Rate Tests in Hi-Pres H_2S, 12-920
Surfactants vs AISI 304L Pitting, 5-299
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483
Zinc Passivation in Oxalate Solution, 10-691
Zr Susceptibility to SCC in 9% HNO_3, 10-745

CHLORINE
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

CHROMATE CONVERSION COATINGS
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Variables' Influence on Electrochemical Tests, 12-856

CHROMIUM
Austenitic SS Sensitization Measurement Prediction, 7-427
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Microstructure Influence on Ni Alloy Cracking, 11-838
N Implantation vs Oxidation AISI 316, 9-611
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC in 182 Welds in 600 vs 288 C $H_2O + O_2$, 6-376
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
SCC of Steel in High-Temperature Water, 5-290
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328

CIRCUIT MODELS, ELECTRICAL
Corroding Area Calculated by Pseudocapacitance, 8-533
Equivalent Circuits — Impedance of Interface, 8-555
Impedance Data Display, 8-556

COAL GAS
Liquid SCC - Mild, Low-Alloy Steel, 11-770

COAL LIQUEFACTION
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468

COAL
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468

COATINGS
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502

COATINGS, METAL
H Attack on Hydroprocessors vs Time, 2-103

COBALT
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Co Behavior on BWR Fuel Rod Surfaces, 6-371
Microstructure Influence on Ni Alloy Cracking, 11-838

COLD WORK
Al Alloy Air Battery Corrosion Studies, 9-652
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

COMBUSTION GASES
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

COMPOSITES
Processing Methods Influence on SiCAl Composites, 10-680
Variables' Influence on Electrchemical Tests, 12-856

COMPUTER CALCULATIONS
AC Impedance Prediction of Corrosion Rate, 5-280
Austenitic SS Sensitization Measurement Prediction, 7-427
Boundary Element Analysis of Potential Current D, 12-926
Computer Analysis of Polarization Rate Tests, 3-158
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-656
Scratching Electrodes Repassivation Kinetics, 3-149
Variables' Influence on Electrochemical Tests, 12-856

CONCENTRATION OF CHEMICALS
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Strauss Test Results on P, S-Doped 304 SS, 12-861
Temp, Low Contamination vs AISI 304 SCC, 11-791
Zr Susceptibility to SCC in 9% HNO_3, 10-745

CONCRETE
Rebar Corrosion Evaluation by Spectroscopy, 1- 2

CONDENSATE, AQUEOUS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
SCC of Rotor Steels in Simulated Condensers, 2- 79 685

CONDENSATION
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
Environment Influence on SCC of Al 7000 Alloy, 10-

900 C Oxychloridation of CrNi + ArCo Mo, 8-544

CONDUCTIVITY
Temp, Low Contamination vs AISI 304 SCC, 11-791
Variables' Influences on Electrochemical Tests, 12-856

CONSTANT DISPLACEMENT CRACKING TESTS
Load Line Displacement Influence: 422 Cracks, 10-756

CONSTANT LOAD TENSILE TESTS
H Cracking of FeSi Single Crystals, 1- 14
Load Line Displacement Influence: 422 Cracks, 10-756
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
Stress Corrosion of AlCuLi 2090 in Na, 12-932

CONTAMINATION
AC Impedance Prediction of Corrosion Rate, 5-280

COOLING EFFECTS
Austenitic SS Sensitization Measurement Prediction, 7-427

COOLING WATER INHIBITORS
N-Base, Organic Inhibitors for Corroded Steel, 8-566

COPPER
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
Cu, Fe, CuFe + H_2O Oxides Precipitation in BWR Reactor, 12-875
DC Pulse Measurement of Fresh Water Systems, 10-750
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Processing Methods Influence on SiCAl Composites, 10-680
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Test Equipment Shape Influence on Cu vs NaCl, 11-768
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

COPPER, WROUGHT, 701-725 CDA COPPER-NICKEL 10-30%
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Microfouling of Metals in Polluted Seawater, 7-423

CORROSION EROSION
Cathodic Protection Parameters Influences on Calcare, 12-887
Measuring Erosion-Corrosion under Grinding, 4-221
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Rotating Electrode Prediction of Attack, 1- 42
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

CORROSION PRODUCTS
AC Impedance Prediction of Corrosion Rate, 5-280
Corroding Area Calculated by Pseudocapacitance, 8-533
Fatigue Crack Electrochemical Measurement, 9-599
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
H Influence on Pitting of Passive Ni in Cl, 10-696
Fe vs Molten Sulfates, 10-724
Metal Coating Defects vs Base Metal Attack, 1- 36
Microfouling of Metals in Polluted Seawater, 7-423
Microstructure Influence on Ni Alloy Cracking, 11-838
N Implantation vs Oxidation AISI 316, 9-611
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Spectrometry of Fe vs Sodium Chloride, 3-131
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483
Zinc Passivation in Oxalate Solution, 10-691

COUPONS
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21

CRACK TIP PHENOMENA
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Characterization of Crack Tip Electrochemistry, 9-623
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Fatigue Crack Electrochemical Measurement, 9-599
H Absorption — High-Strength Steel in NaCl, 3-176
H_2S in Seawater vs CMn Structural Steel, 7-443
Load Line Displacement Influence: 422 Cracks, 10-756
Mg SCC, Liquid Metal Embrittlement, 2-113
Microstructure Influence on Ni Alloy Cracking, 11-838
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
pH, Potential of Steel Cracks in Seawater, 1- 55
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC of Steel in High-Temperature Water, 5-290

CRACKING
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Characterization of Crack Tip Electrochemistry, 9-623
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
Fatigue Crack Electrochemical Measurement, 9-599
H Cracking of FeSi Single Crystals, 1- 14
H_2S in Seawater vs CMn Structural Steel, 7-443
Hydrogen Degradation of FeMnAl Alloys, 4-209
IGSCC AlZnMg Alloys, 4-231
Load Line Displacement Influence: 422 Cracks, 10-756
Mg SCC, Liquid Metal Embrittlement, 2-113
Microfouling of Metals in Polluted Seawater, 7-423
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
pH, Potential of Steel Cracks in Seawater, 1- 55
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC and H Induced Cracking of SS, 1- 50
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
SCC of Rotor Steels in Simulated Condensers, 2- 79
SCC of Steel in High-Temperature Water, 5-290
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Temp, Low Contamination vs AISI 304 SCC, 11-791
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

CREVICES
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
Alloy 600 Grain Margin Influence on IGSCC 5-314
Biofilm Effects on SS Corrosion in Seawater, 10-717
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Defect Concentration Effects in Hot H_2O, 6-334
Fatigue Crack Electrochemical Measurement, 9-599
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Mo-Alloying Influence on 12% Cr Steel, 9-664
Ni Influence on HSC of Low-Alloy Steels, 11-776
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SS Crevice Attack in 25 to 40 C Seawater, 4-194
SS Localized, SCC Attack Prediction Control, 2- 88
Sulfate-Reducing Bacteria vs SS, 9-671

CRYSTALLIZATION
Sulfate-Reducing Bacteria vs SS, 9-671

CURRENT DEMAND FOR C.P.
Cathodic Protection Parameters Influence on Calcare, 12-887

CURRENT DENSITY
Bacterial Influence on Cathodically Protected SS, 5-270
Boundary Element Analysis of Potential Current D, 12-926
Computer Analysis of Polarization Rate Tests, 3-158
Corroding Area Calculated by Pseudocapacitance, 8-533
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Fatigue Crack Electrochemical Measurement, 9-599
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Mo-Alloying Influence on 12% Cr Steel, 9-664
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

CYCLIC STRESSES
Characterization of Crack Tip Electrochemistry, 9-623
Microstructure Influence on Ni Alloy Cracking, 11-838
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

CYCLING, LAB TESTING
H_2S in Seawater vs CMn Structural Steel, 7-443
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Temp, Low Contamination vs AISI 304 SCC, 11-791

DATA CORRELATION
Boundary Element Analysis of Potential Current D, 12-926
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Incorporating Organic Agents in Diagrams, 9-606
Prediction Variables in Cyclic Voltametry, 11-789
Slow Strain Rate Tests in High-Pressure H_2S, 12-920

DEAERATION
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Anodic Behavior of Ti in Aqueous Solution, 10-705
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Radiation Influence on Steel IGA, 9-632
SS Localized, SCC Attack Prediction Control, 2- 88

DEALLOYING
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517

DEFECTS
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397

DEFORMATION
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782

DELAMINATION
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
Variables' Influences on Electrochemical Tests, 12-856

DENDRITIC CORROSION PRODUCTS
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644

DEPASSIVATION
Bacterial Influence on Cathodically Protected SS, 5-270
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

DESICCATION
Mg SCC, Liquid Metal Embrittlement, 2-113

DESIGN
Test Equipment Shape Influence on Cu vs NaCl, 11-768

DIAGRAMS
Incorporating Organic Agents in Diagrams, 9-606

DIFFUSION
Austenitic SS Sensitization Measurement Prediction, 7-427
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Fe Corrosion Chemistry in Boiler System, 3-154
Mg SCC, Liquid Metal Embrittlement, 2-113
N Implantation vs Oxidation AISI 316, 9-611
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Strauss Test Results on P, S-Doped 304 SS, 12-881
Test Equipment Shape Influence on Cu vs NaCl, 11-768

DIGESTERS
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142

DIRECT CURRENT, ACCELERATED LAB TESTS
AC Impedance Prediction of Corrosion Rate, 5-280
DC Pulse Measurement of Fresh Water Systems, 10-750
Impedance, DC Tests of Bacterial Attack, 12-869
Rebar Corrosion Evaluation by Spectroscopy, 1- 2

DISBONDING, COATINGS
H_2 Evolution from Surfaces under Cathodic Protection, 8-572

DISLOCATIONS
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
H Absorption — High-Strength Steel in NaCl, 3-176
H Cracking of FeSi Single Crystals, 1- 14
IGSCC AlZnMg Alloys, 4-231
Mg SCC, Liquid Metal Embrittlement, 2-113
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Processing Methods Influence on SiCAl Composites, 10-680

DODECANOIC ACIDS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638

DRINKING WATER
DC Pulse Measurement of Fresh Water Systems, 10-750
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274

DUCTILITY
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

DUPLEX STAINLESS STEELS
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Mo-Alloying Influence on 12% Cr Steel, 9-664
N Influence on Duplex Steel Simulated Weldments, 5-305
Slow Strain Rate Tests in High-Pressure H_2S, 12-920

DYNAMIC POLARIZATION TESTS
Fatigue Crack Electrochemical Measurement, 9-599
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239

ECONOMICS
Slow Strain Rate Tests in High-Pressure H_2S, 12-920

ELECTRIC ARC WELDING
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511

ELECTRICAL COMMUNICATION EQUIPMENT
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517

ELECTROCHEMICAL TESTING
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Surface Pretreatment of Al Influence on Pits, 7-414

ELECTRODES
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
Scratching Electrodes Repassivation Kinetics, 3-149

ELECTRON MICROSCOPE
Cathodic Protection Parameters Influences on Calcare, 12-887
Crevice attack on Ni-Base Alloys in Cl, s, 12-891

ELECTRONIC INSTRUMENTS
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644

ELECTRONIC TRANSMISSION, EQUIPMENT
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644

EMBRITTLEMENT
H Attack on Hydroprocessors vs Time, 2-103
Ni Local Attack in Neutral Sodium Sulfate, 6-360

ERROR ANALYSIS
Variables'Influence on Electrochemical Tests, 12-856

ETHYL ALCOHOLS
Bacterial Influence on Cathodically Protected SS, 5-270

ETHYLENE-DIAMINE-TETRAACETIC ACID
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Surfactants vs AISI 304L Pitting, 5-299

EXFOLIATION
AA 7075 vs *Cladosporium resinae* Contamination, 9-638

EXTRUSIONS, METAL
Stress Corrosion of AlCuLi 2090 in Na, 12-932

FABRICATION
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Processing Methods Influence on SiCAl Composites, 10-680

FATIGUE STRESSES
Alloy 600 Fatigue in High-Salinity Brine, 12-905
H Absorption — High-Strength Steel in NaCl, 3-176
H_2S in Seawater vs CMn Structural Steel, 7-443
Load Line Displacement Influence: 422 Cracks, 10-756
Microstructure Influence on Ni Alloy Cracking, 11-838
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC and H Induced Cracking of SS, 1- 50
SCC in 182 Welds in 600 vs 286 C $H_2O + O_2$, 6-376
SCC of Rotor Steels in Simulated Condensers, 2- 79

FATIGUE, LAB TESTING
Characterization of Crack Tip Electrochemistry, 9-623
Fatigue Crack Electrochemical Measurement, 9-599
Load Line Displacement Influence: 422 Cracks, 10-756
pH, Potential of Steel Cracks in Seawater, 1- 55
Polarization, Fatigue of FeAlMn in NaCl, 11-810

FATTY ACIDS
Impedance, DC Tests of Bacterial Attack, 12-869

FERRIC CHLORIDES
Mo-Alloying Influence on 12% Cr Steel, 9-664
N Influence on Duplex Steel Simulated Weldments, 5-305

FERRITE EFFECTS
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699

FILMS AND SCALES
AC Impedance Prediction of Corrosion Rate, 5-280
Alloy 600 Fatigue in High-Salinity Brine, 12-905
α-Alkenylphenone Inhibitor Properties, 9-590
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Bacterial Influence on Cathodically Protected SS, 5-270
Biofilm Effects on SS Corrosion in Seawater, 10-717
CrNi Steel vs Formic Acid, 3-136
Cinnamaldehyde Films on Steel vs HCl, 4-248
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
DC Pulse Measurement of Fresh Water Systems, 10-750
Defect Concentration Effects in Hot H_2O, 6-334
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Fatigue Crack Electrochemical Measurement, 9-599
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
H Absorption — High-Strength Steel in NaCl, 3-176
Impedance, DC Tests of Bacterial Attack, 12-869
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Microfouling of Metals in Polluted Seawater, 7-423
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
SCC of Steel in High-Temperature Water, 5-290
SCC — Sensitized SS in $H_2O + Cl + S$, 50 to 200 C, 8-550
Scratching Electrodes Repassivation Kinetics, 3-149
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

FILMS ON MATERIALS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239

FILTERS
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7

FINITE ELEMENT MODELING
Computer Analysis of Polarization Rate Tests, 3-158

FLAWS
Defect Concentration Effects in Hot H_2O, 6-334

FLUORIDES
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Zr Susceptibility to SCC in 9% HNO_3, 10-745

FOILS
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782

FORGING
Austenitic SS Sensitization Measurement Prediction, 7-427

FORMIC ACID
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345

FOULING EFFECTS
H_2S in Seawater vs CMn Structural Steel, 7-443

FRACTOGRAPHIC TESTS
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Environment Influence on SCC of Al 7000 Alloy, 10-685
H Absorption — High-Strength Steel in NaCl, 3-176
H Cracking of FeSi Single Crystals, 1- 14
Hydrogen Degradation of FeMnAl Alloys, 4-209
Load Line Displacement Influence: 422 Cracks, 10-756
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC and H Induced Cracking of SS, 1- 50
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
SCC of Rotor Steels in Simulated Condensers, 2- 79
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435
Zr Susceptibility to SCC in 9% HNO_3, 10-745

FRACTURE
H Cracking of FeSi Single Crystals, 1- 14
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
SCC of Steel in High-Temperature Water, 5-290
Temp, Low Contamination vs AISI 304 SCC, 11-791
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

FREE ENERGY CALCULATIONS
Incorporating Organic Agents in Diagrams, 9-606

FRESH AQUEOUS ON-SITE TESTING
DC Pulse Measurement of Fresh Water Systems, 10-750

FRICTION
N Implantation vs Oxidation AISI 316, 9-611
Rotating Electrode Prediction of Attack, 1- 42

FUMES
Metal Coating Defects vs Base Metal Attack, 1- 36
Zr Susceptibility to SCC in 9% HNO_3, 10-745

FUNGI
AA 7075 vs *Cladosporium resinae* Contamination, 9-638

GALVANIC CAUSES
Surfactants vs AISI 304L Pitting, 5-299

GALVANIC CELLS
Boundary Element Analysis of Potential Current D, 12-926
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
CuNi Piling Sheaths—Two-Year Study Results, 7-478
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Galvanic Cell Measurement of Al, Steel a, 12-900
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Microstructure Influence on Ni Alloy Cracking, 11-838
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

GALVANIC, ELECTRICITY GENERATION EQUIPMENT
Al Alloy Air Battery Corrosion Studies, 9-652

GALVANIZED STEEL
DC Pulse Measurement of Fresh Water Systems, 10-750
Mg Influence on Atmosphere Attack on Galvanic Steel, 4-229
Variables' Influence on Electrochemical Tests, 12-856

GALVANOSTATIC TESTING
Computer Analysis of Polarization Rate Tests, 3-158
Fe vs Molten Sulfates, 10-724
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322

GAMMA LAB TESTING
Radiation Influence on Steel IGA, 9-632

GAS SCRUBBERS
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

GASES OR VAPORS
DC Pulse Measurement of Fresh Water Systems, 10-750
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Metal Coating Defects vs Base Metal Attack, 1- 36
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169

GASKETS
SS Localized, SCC Attack Prediction Control, 2- 88

GEOMETRICAL EFFECTS
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Boundary Element Analysis of Potential Current D, 12-926
Corroding Area Calculated by Pseudocapacitance, 8-533
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
Defect Concentration Effects in Hot H_2O, 6-334
Fatigue Crack Electrochemical Measurement, 9-599
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Rotating Electrode Prediction of Attack, 1- 42
Scratching Electrodes Repassivation Kinetics, 3-149
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

GEOMETRY, SPECIMEN PREPARATION
Test Equipment Shape Influence on Cu vs NaCl, 11-768

GEOTHERMAL ENERGY
Alloy 600 Fatigue in High-Salinity Brine, 12-905

GLASS
Electrochemical Estimation — Grinding Media, 11-837

GLASSY METALS
FeNiB Glasses Influence by Mo, Si Alloying, 5-263

GRAIN EFFECTS
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Austenitic SS Sensitization Measurement Prediction, 7-427
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Grain Boundary Influence on IGSCC, 6-364
Hydrogen Degradation of FeMnAl Alloys, 4-209
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
Ni Local Attack in Neutral Sodium Sulfate, 6-360
P Distribution During Tempering of AISI 4130 Steel, 7-465
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
Strauss Test Results on P, S-Doped 304 SS, 12-881
Stress Corrosion of AlCuLi 2090 in Na, 12-932
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

GRAIN CAUSES
Alloy 600 Grain Margin Influence on IGSCC 5-314
H Cracking of FeSi Single Crystals, 1- 14
Fe Corrosion Chemistry in Boiler System, 3-154
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
SCC Al-Li Alloy 8090 in NaCl, 8-527
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328

GRAPHIC DATA
Incorporating Organic Agents in Diagrams, 9-606

GRINDERS
Electrochemical Estimation — Grinding Media, 11-837

GRINDING
Measuring Erosion-Corrosion under Grinding, 4-221

HALOGENS
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

HARDNESS
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
N Implantation vs Oxidation AISI 316, 9-611
Ni Influence on HSC of Low-Alloy Steels, 11-776
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC of Steel in High-Temperature Water, 5-290
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

HARDNESS TESTING
Electrochemical Estimation — Grinding Media, 11-837

HASTELLOY B
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

HASTELLOY C-276
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

HASTELLOY C-4
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

HASTELLOY G
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

HASTELLOY X
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

HAYNES-STELLITE 25 WROUGHT + OTHERS
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

HEAT AFFECTED ZONE
Austenitic SS Sensitization Measurement Prediction, 7-427
H_2S in Seawater vs CMn Structural Steel, 7-443
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776

HEAT EXCHANGERS
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Defect Concentration Effects in Hot H_2O, 6-334
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Zr Susceptibility to SCC in 9% HNO_3, 10-745

HEAT FLUX
Defect Concentration Effects in Hot H_2O, 6-334
N-Base, Organic Inhibitors for Corroded Steel, 8-566

HEAT TREATMENT
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Austenitic SS Sensitization Measurement Prediction, 7-427
Grain Boundary Influence on IGSCC, 6-364
H Attack on Hydroprocessors vs Time, 2-103
IGSCC AlZnMg Alloys, 4-231
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
Ni Influence on HSC of Low-Alloy Steels, 11-776
P Distribution During Tempering of AISI 4130 Steel, 7-465
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Processing Methods Influence on SiCAl Composites, 10-660
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC of Rotor Steels in Simulated Condensers, 2- 79
SCC of Steel in High-Temperature Water, 5-290
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435
Zr Susceptibility to SCC in 9% HNO_3, 10-745
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511

HIGH-PURITY AQUEOUS ENVIRONMENTS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875
H Induced Cracking of SS in High-Temperature Water, 2-124
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
SCC of Steel in High-Temperature Water, 5-290
Temp, Low Contamination vs AISI 304 SCC, 11-791

HIGH TEMPERATURES
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Defect Concentration Effects in Hot H_2O, 6-334
Grain Boundary Influence on IGSCC, 6-364
H Induced Cracking of SS in High-Temperature Water, 2-124
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Fe vs Molten Sulfates, 10-724
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73

HOLIDAY TESTS
Corroding Area Calculated by Pseudocapacitance, 8-533

HOT FABRICATION
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21

HUMID ATMOSPHERE
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644

HYDRAULIC CONCRETE COATINGS
CuNi Piling Sheaths—Two-Year Study Results, 7-478

HYDRIDES
Mg SCC, Liquid Metal Embrittlement, 2-113

HYDROCARBONS, INHIBITORS TO
Surfactants vs AISI 304L Pitting, 5-299

HYDROCHLORIC ACIDS
α-Alkenylphenone Inhibitor Properties, 9-590
Anodic Behavior of Ti in Aqueous Solution, 10-705
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66

HYDROFLUORIC ACIDS
Zr Susceptibility to SCC in 9% HNO_3, 10-745

HYDROGEN EMBRITTLEMENT
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Grain Boundary Influence on IGSCC, 6-364
H Attack on Hydroprocessors vs Time, 2-103
H Induced Cracking of SS in High-Temperature Water, 2-124
Hydrogen Degradation of FeMnAl Alloys, 4-209
IGSCC AlZnMg Alloys, 4-231
Microstructure Influence on Ni Alloy Cracking, 11-838
Ni Influence on HSC of Low-Alloy Steels, 11-776
P Distribution During Tempering of AISI 4130 Steel, 7-465
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC and H Induced Cracking of SS, 1- 50
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

HYDROGEN PERMEATION TEST
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738

HYDROGEN PEROXIDE
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66

HYDROGEN, ATOMIC
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
H Absorption — High-Strength Steel in NaCl, 3-176
H Attack on Hydroprocessors vs Time, 2-103
High-Temperature Attack in 304 SS Crevices, 4-204
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Hydrogen Degradation of FeMnAl Alloys, 4-209
H_2S in Seawater vs CMn Structural Steel, 7-443
Mg SCC, Liquid Metal Embrittlement, 2-113
SCC of Rotor Steels in Simulated Condensers, 2- 79

HYDROGEN, CAUSES
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Cathodic Protection Parameters Influence on Calcare, 12-887
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
H Cracking of FeSi Single Crystals, 1- 14
H Influence on Pitting of Passive Ni in Cl, 10-696
High-Temperature Attack in AISI 304 SS Crevices, 4-204
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Fe Corrosion Chemistry in Boiler System, 3-154
Mg SCC, Liquid Metal Embrittlement, 2-113
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435
Zinc Passivation in Oxalate Solution, 10-691

HYDROGEN, SULFIDE
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Defect Concentration Effects in Hot H_2O, 6-334
Environmental Factors Influence H_2 Attack on Line Pipe, 10-736
H_2S in Seawater vs CMn Structural Steel, 7-443
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
Oilfield Fluids vs Alloy Steels, 12-916
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Sulfate-Reducing Bacteria vs SS, 9-671
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

HYDROLYSIS
pH, Potential of Steel Cracks in Seawater, 1- 55

HYDROXIDES
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461

HYSTERESIS TESTS
SS Localized, SCC Attack Prediction Control, 2- 88

IMMERSION TESTING
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
DC Pulse Measurement of Fresh Water Systems, 10-750
Mo-Alloying Influence on 12% Cr Steel, 9-664
Processing Methods Influence on SiCAl Composites, 10-680
Sulfate-Reducing Bacteria vs SS, 9-671

IMPACT, LABORATORY TESTS
Mo-Alloying Influence on 12% Cr Steel, 9-664
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

IMPEDANCE, ELECTRICAL TESTING
AC Impedance Prediction of Corrosion Rate, 5-280
Anodic Behavior of Ti in Aqueous Solution, 10-705
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Equivalent Circuits — Impedance of Interface, 8-555
Impedance Data Display, 8-558
Impedance, DC Tests of Bacterial Attack, 12-869
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Rebar Corrosion Evaluation by Spectroscopy, 1- 2
Variables' Influence on Electrchemical Tests, 12-856
Zinc Passivation in Oxalate Solution, 10-691

IMPINGEMENT
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Rotating Electrode Prediction of Attack, 1- 42
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

INCLUSIONS
Metal Coating Defects vs Base Metal Attack, 1- 36
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SCC of Steel in High-Temperature Water, 5-290
Sulfate-Reducing Bacteria vs SS, 9-671

INCOLOYS 800, 800H, 801
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

INDIUM
Al Alloy Air Battery Corrosion Studies, 9-652

INDUSTRIAL ATMOSPHERES
Mg Influence on Atmosphere Attack on Galvanic Steel, 4-229

INFRARED LIGHT TESTING
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

INHIBITORS
AC Impedance Prediction of Corrosion Rate, 5-280
Al Alloy Air Battery Corrosion Studies, 9-652
Cinnamaldehyde Films on Steel vs HCl, 4-248
Computer Analysis of Polarization Rate Tests, 3-158
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
DC Pulse Measurement of Fresh Water Systems, 10-750
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Oilfield Fluids vs Alloy Steels, 12-916
Surfactants vs AISI 304L Pitting, 5-299
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Variables' Influence on Electrchemical Tests, 12-856
Zn, ZnAl Reactions vs 3% NaCl, 1- 62
Zr Susceptibility to SCC in 9% HNO_3, 10-745

INITIATION, CRACKING
IGSCC AlZnMg Alloys, 4-231

INORGANIC-METAL MULTIPHASE MATERIALS
H Cracking of FeSi Single Crystals, 1- 14

INSTANTANEOUS RATE TESTS
DC Pulse Measurement of Fresh Water Systems, 10-750
Galvanic Cell Measurement of Al, Steel A, 12-900
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

INSULATION, ELECTRICAL
H_2 Evolution from Surfaces under Cathodic Protection, 8-572

INSULATORS, NUCLEAR RADIATION
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502

INTERFACE EFFECTS
α-Alkenylphenone Inhibitor Properties, 9-590
Corroding Area Calculated by Pseudocapacitance, 8-533
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Equivalent Circuits — Impedance of Interface, 8-555
Impedance Data Display, 8-558
Fe vs Molten Sulfates, 10-724
Metal Coating Defects vs Base Metal Attack, 1- 36
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
Surfactants vs AISI 304L Pitting, 5-299
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

INTERGRANULAR CRACKING
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
P Distribution During Tempering of AISI 4130 Steel, 7-465
SCC Al-Li Alloy 8090 in NaCl, 8-527

INTERGRANULAR EFFECTS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Grain Boundary Influence on IGSCC, 6-364
H Cracking of FeSi Single Crystals, 1- 14
H Induced Cracking of SS in High-Temperature Water, 2-124
Hydrogen Degradation of FeMnAl Alloys, 4-209
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
IGSCC AlZnMg Alloys, 4-231
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
H Influence on Duplex Steel Simulated Weldments, 5-305
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Radiation Influence on Steel IGA, 9-632
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239
SCC — Sensitized SS in H_2O + Cl + S, 50 to 200 C, 8-560
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
Sulfate-Reducing Bacteria vs SS, 9-671
Temp, Low Contamination vs AISI 304 SCC, 11-791
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

INTERMETALLIC PHASE
Surface Pretreatment of Al Influence on Pits, 7-414

IODIDES
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322

ION EXCHANGE
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239

IONIC EFFECTS
Characterization of Crack Tip Electrochemistry, 9-623
Co Behavior on BWR Fuel Rod Surfaces, 6-371
Incorporating Organic Agents in Diagrams, 9-606
Fe Corrosion Chemistry in Boiler System, 3-154
Oilfield Fluids vs Alloy Steels, 12-916
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Spectrometry of Fe vs Sodium Chloride, 3-131
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Temp, Low Contamination vs AISI 304 SCC, 11-791
Zinc Passivation in Oxalate Solution, 10-691

IRON
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
H Cracking of FeSi Single Crystals, 1- 14
Hydrogen Degradation of FeMnAl Alloys, 4-209
Fe Corrosion Chemistry in Boiler System, 3-154
Microfouling of Metals in Polluted Seawater, 7-423
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Spectrometry of Fe vs Sodium Chloride, 3-131
Surface Pretreatment of Al Influence on Pits, 7-414

IRON OXIDES
Co Behavior on BWR Fuel Rod Surfaces, 6-371
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Incorporating Organic Agents in Diagrams, 9-606
Fe vs Molten Sulfates, 10-724
N Implantation vs Oxidation AISI 316, 9-611
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

IRON SULFIDES
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Sulfate-Reducing Bacteria vs SS, 9-671

ISOTOPES
Co Behavior on BWR Fuel Rod Surfaces, 6-371

KETONES
α-Alkenylphenone Inhibitor Properties, 9-590

KINETICS
Anodic Behavior of Ti in Aqueous Solution, 10-705
Environment Influence on SCC of Al 7000 Alloy, 10-685
Incorporating Organic Agents in Diagrams, 9-606
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

KRAFT PROCESS
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142

LEAD
Al Alloy Air Battery Corrosion Studies, 9-652

LINEAR POLARIZATION TESTS
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658

LIQUID METAL EMBRITTLEMENT
Mg SCC, Liquid Metal Embrittlement, 2-113

LITHIUM
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Fe vs Molten Sulfates, 10-724
SCC Al-Li Alloy 8090 in NaCl, 8-527
Stress Corrosion of AlCuLi 2090 in Na, 12-932

LITHIUM HYDROXIDE
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
H Induced Cracking of SS in High-Temperature Water, 2-124

LOCALIZED EFFECTS
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SS Localized, SCC Attack Prediction Control, 2- 88

LOW TEMPERATURES
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

MACROORGANISMS
SS Crevice Attack in 25 to 40 C Seawater, 4-194

MAGNESIUM
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Mg Influence on Atmosphere Attack on Galvanic Steel, 4-229
Mg SCC, Liquid Metal Embrittlement, 2-113
Radiation Influence on Steel IGA, 9-632
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

MAGNESIUM CHLORIDE
Radiation Influence on Steel IGA, 9-632
SCC and H Induced Cracking of SS, 1- 50

MAGNETITE
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Fe Corrosion Chemistry in Boiler System, 3-154
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
N-Base, Organic Inhibitors for Corroded Steel, 8-566
SCC of Steel in High-Temperature Water, 5-290
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

MAGNETOSTRICTIVE EQUIPMENT
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

MANGANESE
Hydrogen Degradation of FeMnAl Alloys, 4-209
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Surface Pretreatment of Al Influence on Pits, 7-414

MARINE ATMOSPHERIC
Mg Influence on Atmosphere Attack on Galvanic Steel, 4-229
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

MASS TRANSFER
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Rotating Electrode Prediction of Attack, 1- 42

MESA ATTACK
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

METAL COATINGS
Metal Coating Defects vs Base Metal Attack, 1- 36

METAL PIPES
Alloy 600 Grain Margin Influence on IGSCC 5-314
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
N Influence on Duplex Steel Simulated Weldments, 5-305
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

METAL POWDER COMPACTS
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165

METALLOGRAPHIC TESTS
Measuring Erosion-Corrosion under Grinding, 4-221
Mg SCC, Liquid Metal Embrittlement, 2-113
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

METALLOIDS
FeNiB Glasses Influence by Mo, Si Alloying, 5-263

METALLURGICAL FACTORS
Ni Influence on HSC of Low-Alloy Steels, 11-776
Zr Susceptibility to SCC in 9% HNO_3, 10-745

METALS, MOLTEN
Mg SCC, Liquid Metal Embrittlement, 2-113

MICROGRAPHY
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782

MICROORGANISMS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
Biofilm Effects on SS Corrosion in Seawater, 10-717
Microfouling of Metals in Polluted Seawater, 7-423
Sulfate-Reducing Bacteria vs SS, 9-671

MICROSCOPIC TESTING
Alloy 600 Fatigue in High-Salinity Brine, 12-905

MICROSTRUCTURE, METALS
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
N Influence on Duplex Steel Simulated Weldments, 5-305
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SCC of Rotor Steels in Simulated Condensers, 2- 79
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Time-Temperature-Transformation Diagram—Alloy 925, 11-827

MINING EQUIPMENT
Rotating Electrode Prediction of Attack, 1- 42

MOLECULAR EFFECTS
Surfactants vs AISI 304L Pitting, 5-299

MOLTEN SALTS
Fe vs Molten Sulfates, 10-724

MOLYBDENUM
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
CrNi Steel vs Formic Acid, 3-136
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Mo-Alloying Influence on 12% Cr Steel, 9-664
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
SCC of Steel in High-Temperature Water, 5-290

MORPHOLOGY, PITTING
Sulfate-Reducing Bacteria vs SS, 9-671

MORPHOLOGY, SCALE
Fe Corrosion Chemistry in Boiler System, 3-154

NEUTRAL PH
AC Impedance Prediction of Corrosion Rate, 5-280
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

NICKEL
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
H Attack on Hydroprocessors vs Time, 2-103
H Influence on Pitting of Passive Ni in Cl, 10-696
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Ni Influence on HSC of Low-Alloy Steels, 11-776
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SCC of Steel in High-Temperature Water, 5-290

NICKEL ALLOYS
Microstructure Influence on Ni Alloy Cracking, 11-838
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169

NICKEL-CHROMIUM-IRON ALLOYS
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Zr Susceptibility to SCC in 9% HNO_3, 10-745

NICKEL-CHROMIUM-MOLYBDENUM ALLOYS
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
SCC of Rotor Steels in Simulated Condensers, 2- 79

NICKEL-COPPER ALLOYS
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
CuNi Piling Sheaths—Two-Year Study Results, 7-478

NICKEL-MOLYBDENUM MATERIALS
Local Attack on NiMo Alloys in Hot NaCl, 4-199

NIOBIUM
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169

NITRATES
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66

NITRIC ACIDS
Anodic Behavior of Ti in Aqueous Solution, 10-705
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Mo-Alloying Influence on 12% Cr Steel, 9-664
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
Surface Pretreatment of Al Influence on Pits, 7-414

NITRIDES
N Implantation vs Oxidation AISI 316, 9-611
N Influence on Duplex Steel Simulated Weldments, 5-305

NITROGEN INHIBITORS
α-Alkenylphenone Inhibitor Properties, 9-590
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Surfactants vs AISI 304L Pitting, 5-299

NITROGEN
Electrochemical Study of H_3PO_4 Films on Al, 6-354
N Influence on Duplex Steel Simulated Weldments, 5-305
Sulfate-Reducing Bacteria vs SS, 9-671

NITROGENOUS COMPOUNDS
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214

NITROUS OXIDE
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7

NONAQUEOUS LIQUIDS (NOT METALS)
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658

NONDESTRUCTIVE TESTING
Computer Analysis of Polarization Rate Tests, 3-158

NONMETAL PIPES
Austenitic SS Sensitization Measurement Prediction, 7-427

NUCLEAR GRADE STAINLESS STEEL
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
SCC Inconel Welds in High-Temperature $H_2O + H_2SO_4$, 4-239

NUCLEAR REACTORS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 600 Grain Margin Influence on IGSCC 5-314
Co Behavior on BWR Fuel Rod Surfaces, 6-371
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875
Defect Concentration Effects in Hot H_2O, 6-334

Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC Inconel Welds in High-Temperature $H_2O+H_2SO_4$, 4-239
SCC of Steel in High-Temperature Water, 5-290

NUCLEAR WASTE MIXTURES
Local Attack on NiMo Alloys in Hot NaCl, 4-199

NUCLEATION, PITTING
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29

NYQUIST DIAGRAMS
AC Impedance Prediction of Corrosion Rate, 5-280
Corroding Area Calculated by Pseudocapacitance, 8-533
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Impedance Data Display, 8-558
N-Base, Organic Inhibitors for Corroded Steel, 8-566
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Variables' Influence on Electrchemical Tests, 12-856

OILS, PETROLEUM WELLS
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Fatigue Crack Electrochemical Measurement, 9-599
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

ON-SITE OR PILOT PLANT TESTING
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Mg Influence on Atmosphere Attack on Galvanic Steel, 4-228
Oilfield Fluids vs Alloy Steels, 12-916
On-Site Polarization Tests of Steel in Concrete, 10-761
SS Crevice Attack in 25 to 40 C Seawater, 4-194
Variables' Influence on Electrchemical Tests, 12-856

OPTICAL NONDESTRUCTIVE TESTING
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
H Influence on Pitting of Passive Ni in Cl, 10-696
IGSCC AlZnMg Alloys, 4-231
Measuring Erosion-Corrosion under Grinding, 4-221
Surface Pretreatment of Al Influence on Pits, 7-414

ORDNANCE
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502

ORGANIC COATINGS
Variables' Influence on Electrchemical Tests, 12-856

ORGANIC INHIBITORS
N-Base, Organic Inhibitors for Corroded Steel, 8-566

ORIENTATION OF SURFACES
Variables' Influence on Electrchemical Tests, 12-856

ORIENTATION, GRAIN
H Cracking of FeSi Single Crystals, 1- 14
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Zr Susceptibility to SCC in 9% HNO_3, 10-745

OSMOSIS
Bacterial Influence on Cathodically Protected SS, 5-270

OXALATES
Zinc Passivation in Oxalate Solution, 10-691

OXALIC ACIDS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Zinc Passivation in Oxalate Solution, 10-691

OXIDATION
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Bacterial Influence on Cathodically Protected SS, 5-270
Biofilm Effects on SS Corrosion in Seawater, 10-717
Cathodic Protection Parameters Influence on Calcare, 12-887
Cu, Fe, CuFe+H_2O Oxides Precip in BWR Reactor, 12-875
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
Fe Corrosion Chemistry in Boiler System, 3-154
Fe vs Molten Sulfates, 10-724
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Impedance, DC Tests of Bacterial Attack, 12-869
Measuring Erosion-Corrosion under Grinding, 4-221
N-Base, Organic Inhibitors for Corroded Steel, 8-566
N Implantation vs Oxidation AISI 316, 9-611
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
SCC in 182 Welds in 600 vs 288 C H_2O +O_2, 6-376
Spectrometry of Fe vs Sodium Chloride, 3-131
SS Crevice Attack in 25 to 40 C Seawater, 4-194
Zn, ZnAl Reactions vs 3% NaCl, 1- 62
Zr Susceptibility to SCC in 9% HNO_3, 10-745
900 C Oxychloridation of CrNi+ArCo Mo, 8-544

OXIDES
Characterization of Crack Tip Electrochemistry, 9-623
CrNi Steel vs Formic Acid, 3-136
Defect Concentration Effects in Hot H_2O, 6-334
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7

OXYGEN
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Anodic Behavior of Ti in Aqueous Solution, 10-705
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Electrochemical Estimation — Grinding Media, 11-837
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
SCC in 182 Welds in 600 vs 288 C H_2O +O_2, 6-376
SCC of Steel in High-Temperature Water, 5-290
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Temp, Low Contamination vs AISI 304 SCC, 11-791
Zinc Passivation in Oxalate Solution, 10-691
900 C Oxychloridation of CrNi+ArCo Mo, 8-544

PAPER INDUSTRY
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142

PARTICULATES
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Rotating Electrode Prediction of Attack, 1- 42

PASSIVATION
AC Impedance Prediction of Corrosion Rate, 5-280
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Anodic Behavior of Ti in Aqueous Solution, 10-705
CrNi Steel vs Formic Acid, 3-136
Cl Concentration Influence on Steel in Concrete, 7-489
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
H Influence on Pitting of Passive Ni in Cl, 10-696
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Prediction Variables in Cyclic Voltametry, 11-789
SCC Al-Li Alloy 8090 in NaCl, 8-527
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
Zinc Passivation in Oxalate Solution, 10-691
Zr Susceptibility to SCC in 9% HNO_3, 10-745

PERFORATION, COATINGS
Metal Coating Defects vs Base Metal Attack, 1- 36

PERMEATION, MATERIALS, EFFECTS
Fatigue Crack Electrochemical Measurement, 9-599
H Absorption — High-Strength Steel in NaCl, 3-176
Ni Influence on HSC of Low-Alloy Steels, 11-776

PETROLEUM
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
N Influence on Duplex Steel Simu- lated Weldments, 5-305
Oilfield Fluids vs Alloy Steels, 12-916

PH CHANGES, EFFECTS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Bacterial Influence on Cathodically Protected SS, 5-270
Characterization of Crack Tip Electrochemistry, 9-623
Cl Concentration Influence on Steel in Concrete, 7-489
Co Behavior on BWR Fuel Rod Surfaces, 6-371
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Defect Concenration Effects in Hot H_2O, 6-334
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Fe Corrosion Chemistry in Boiler System, 3-154
Impedance, DC Tests of Bacterial Attack, 12-869
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Measuring Erosion-Corrosion under Grinding, 4-221
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
pH, Potential of Steel Cracks in Seawater, 1- 55
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Processing Methods Influence on SiCAl Composites, 10-680
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC Inconel Welds in High-Temperature $H_2O+H_2SO_4$, 4-239
SCC — Sensitized SS in H_2O+Cl+S, 50 to 200 C, 8-560
Spectrometry of Fe vs Sodium Chloride, 3-131
SS Crevice Attack in 25 to 40 C Seawater, 4-194
SS Localized, SCC Attack Prediction Control, 2- 86
Temp, Low Contamination vs AISI 304 SCC, 11-791
Vibratory Amp Influence on Erosion-Corrosion, 2- 97
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

PHASE EFFECTS
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

PHASE CAUSES
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Hydrogen Degradation of FeMnAl Alloys, 4-209

PHENOLICS
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658

PHOSPHATE COATINGS
Variables' Influence on Electrchemical Tests, 12-856

PHOSPHORIC ACIDS
Anodic Behavior of Ti in Aqueous Solution, 10-705
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214

PHOSPHORUS
Al Alloy Air Battery Corrosion Studies, 9-652
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Grain Boundary Influence on IGSCC, 6-364
P Distribution During Tempering of AISI 4130 Steel, 7-455
Strauss Test Results on P, S-Doped 304 SS, 12-881

PHOTOGRAPHIC TESTING
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711

PILING
CuNi Piling Sheaths—Two-Year Study Results, 7-478

PIPELINES
Corroding Area Calculated by Pseudocapacitance, 8-533
H_2 Evolution from Surfaces under Cathodic Protection, 8-572

PITTING
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Biofilm Effects on SS Corrosion in Seawater, 10-717
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Defect Concentration Effects in Hot H_2O, 6-334
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
H Influence on Pitting of Passive Ni in Cl, 10-696
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Measuring Erosion-Corrosion under Grinding, 4-221
Microfouling of Metals in Polluted Seawater, 7-423
Mo-Alloying Influence on 12% Cr Steel, 9-664
Ni Local Attack in Neutral Sodium Sulfate, 6-360
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Oilfield Fluids vs Alloy Steels, 12-916
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC Al-Li Alloy 8090 in NaCl, 8-527
SS Localized, SCC Attack Prediction Control, 2- 88
Sulfate-Reducing Bacteria vs SS, 9-671
Surface Pretreatment of Al Influence on Pits, 7-414
Surfactants vs AISI 304L Pitting, 5-299
Variables' Influence on Electrchemical Tests, 12-856

PLATINUM
Fe vs Molten Sulfates, 10-724

POLARIZATION EFFECTS
Equivalent Circuits — Impedance of Interface, 8-555
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

POLARIZATION TESTS
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
AC Impedance Prediction of Corrosion Rate, 5-280
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Anodic Behavior of Ti in Aqueous Solution, 10-705
Boundary Element Analysis of Potential Current D, 12-926
Characterization of Crack Tip Electrochemistry, 9-623
CrNi Steel vs Formic Acid, 3-136
Computer Analysis of Polarization Rate Tests, 3-158
Corroding Area Calculated by Pseudocapacitance, 8-533
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Electrochemical Estimation — Grinding Media, 11-837
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
H Absorption — High-Strength Steel in NaCl, 3-176
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Fe vs Molten Sulfates, 10-724
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Measuring Erosion-Corrosion under Grinding, 4-221
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Ni Influence on HSC of Low-Alloy Steels, 11-776
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Processing Methods Influence on SiCAl Composites, 10-680
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC of Rotor Steels in Simulated Condensers, 2- 79
SCC of Steel in High-Temperature Water, 5-290
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Variables' Influence on Electrchemical Tests, 12-856
Zinc Passivation in Oxalate Solution, 10-691

POLARIZATION, CAUSES
Cathodic Protection Parameters Influence on Calcare, 12-887
H_2 Evolution from Surfaces under Cathodic Protection, 8-572

POLISHING
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

POLLUTED WATER
Microfouling of Metals in Polluted Seawater, 7-423

POLYMERIC INHIBITORS
α-Alkenylphenone Inhibitor Properties, 9-590
DC Pulse Measurement of Fresh Water Systems, 10-750

POROSITY
Cathodic Protection Parameters Influence on Calcare, 12-887
Fe Corrosion Chemistry in Boiler System, 3-154
Variables' Influence on Electrchemical Tests, 12-856

POTASSIUM FERRICYANIDE TEST
Fatigue Crack Electrochemical Measurement, 9-599

POTASSIUM HYDROXIDE
Al Alloy Air Battery Corrosion Studies, 9-652

POTASSIUM
Fe vs Molten Sulfates, 10-724
Mg SCC, Liquid Metal Embrittlement, 2-113

POTENTIAL TESTS
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
On-Site Polarization Tests of Steel in Concrete, 10-761
Scratching Electrodes Repassivation Kinetics, 3-149
SS Crevice Attack in 25 to 40 C Seawater, 4-194

POTENTIALS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Al Alloy Air Battery Corrosion Studies, 9-652
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Biofilm Effects on SS Corrosion in Seawater, 10-717
Boundary Element Analysis of Potential Current D, 12-926
Characterization of Crack Tip Electrochemistry, 9-623
Cl Concentration Influence on Steel in Concrete, 7-489
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875
DC Pulse Measurement of Fresh Water Systems, 10-750
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Fatigue Crack Electrochemical Measurement, 9-599
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
IGSCC AlZnMg Alloys, 4-231
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Fe vs Molten Sulfates, 10-724
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo-Alloying Influence on 12% Cr Steel, 9-664
N-Base, Organic Inhibitors for Corroded Steel, 8-566
On-Site Polarization Tests of Steel in Concrete, 10-761
pH, Potential of Steel Cracks in Seawater, 1- 55
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Processing Methods Influence on SiCAl Composites, 10-680
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC of Steel in High-Temperature Water, 5-290
SCC — Sensitized SS in H_2O + Cl + S, 50 to 200 C, 8-560
SS Localized, SCC Attack Prediction Control, 2- 88
Temp, Low Contamination vs AISI 304 SCC, 11-791
Zinc Passivation in Oxalate Solution, 10-691
Zr Susceptibility to SCC in 9% HNO_3, 10-745

POTENTIODYNAMIC TESTS
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
α-Alkenylphenone Inhibitor Properties, 9-590
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Measuring Erosion-Corrosion under Grinding, 4-221
Microfouling of Metals in Polluted Seawater, 7-423
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo-Alloying Influence on 12% Cr Steel, 9-664
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
Oilfield Fluids vs Alloy Steels, 12-916
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Prediction Variables in Cyclic Voltametry, 11-789
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
SS Localized, SCC Attack Prediction Control, 2- 88
Variables' Influence on Electrchemical Tests, 12-856
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

POTENTIOMETER TESTING
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386

POTENTIOSTATIC TESTS
AC Impedance Prediction of Corrosion Rate, 5-280
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
H Induced Cracking of SS in High-Temperature Water, 2-124
IGSCC AlZnMg Alloys, 4-231
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
SS Crevice Attack in 25 to 40 C Seawater, 4-194
Test Equipment Shape Influence on Cu vs NaCl, 11-768
Variables' Influence on Electrchemical Tests, 12-856

PRECIPITATION-HARDENING STEELS
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169

PRECIPITATION, EFFECTS
Austenitic SS Sensitization Measurement Prediction, 7-427
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875
Microstructure Influence on Ni Alloy Cracking, 11-838
Stress Corrosion of AlCuLi 2090 in Na, 12-932

PREDICTIVE CALCULATIONS
AC Impedance Prediction of Corrosion Rate, 5-280
Austenitic SS Sensitization Measurement Prediction, 7-427
Electrochemical Estimation — Grinding Media, 11-837
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
H Attack on Hydroprocessors vs Time, 2-103
H Cracking of FeSi Single Crystals, 1- 14
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Metal Coating Defects vs Base Metal Attack, 1- 36
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
pH, Potential of Steel Cracks in Seawater, 1- 55
Prediction Variables in Cyclic Voltametry, 11-789
Rebar Corrosion Evaluation by Spectroscopy, 1- 2
Rotating Electrode Prediction of Attack, 1- 42
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
SS Crevice Attack in 25 to 40 C Seawater, 4-194
SS Localized, SCC Attack Prediction Control, 2- 88

PRESSURE
Cl Concentration Influence on Steel in Concrete, 7-489
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142

PRESSURE, HIGH
Microstructure Influence on Ni Alloy Cracking, 11-838
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Slow Strain Rate Tests in High-Pressure H_2S, 12-920

PRODUCTION, PETROLEUM
Oilfield Fluids vs Alloy Steels, 12-916

PROTON, EFFECTS
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Fe Corrosion Chemistry in Boiler System, 3-154

PUMPS
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770

QUALITY CONTROL
Slow Strain Rate Tests in High-Pressure H_2S, 12-920

RADIATION EFFECTS
Co Behavior on BWR Fuel Rod Surfaces, 6-371
Radiation Influence on Steel IGA, 9-632

RADIATION LAB TESTING
Radiation Influence on Steel IGA, 9-632

RADIOLYSIS
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875

RATE CALCULATIONS
Cathodic Protection Parameters Influence on Calcare, 12-887
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Galvanic Cell Measurement of Al, Steel A, 12-900
Impedance, DC Tests of Bacterial Attack, 12-869
Oilfield Fluids vs Alloy Steels, 12-916
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Strauss Test Results on P, S-Doped 304 SS, 12-881
Variables' Influence on Electrchemical Tests, 12-856

RATE, PITTING
Surface Pretreatment of Al Influence on Pits, 7-414

REDOX, ELECTROCHEMICAL CAUSES
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Temp, Low Contamination vs AISI 304 SCC, 11-791

REDUCING ENVIRONMENTS
Defect Concentration Effects in Hot H_2O, 6-334

REFINING, PETROLEUM
H Attack on Hydroprocessors vs Time, 2-103

REFRACTORIES
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

RESIDUAL FUEL OIL
AA 7075 vs *Cladosporium resinae* Contamination, 9-638

RESIDUAL STRESSES
Alloy 600 Grain Margin Influence on IGSCC 5-314

RESISTANCE, ELECTRICAL
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
On-Site Polarization Tests of Steel in Concrete, 10-761

RIVETS
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770

ROCKETS
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7

RODS, FUEL WATER COOLED REACTORS
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875

ROLLED SHAPES, METAL
Stress Corrosion of AlCuLi 2090 in Na, 12-932

RUBIDIUM
Mg SCC, Liquid Metal Embrittlement, 2-113

SALT FOG OR SPRAY TESTING
Surface Pretreatment of Al Influence on Pits, 7-414

SALT, AQUEOUS
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Bacterial Influence on Cathodically Protected SS, 5-270
Biofilm Effects on SS Corrosion in Seawater, 10-717
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Mo-Alloying Influence on 12% Cr Steel, 9-664
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
Oilfield Fluids vs Alloy Steels, 12-916
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Radiation Influence on Steel IGA, 9-632
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

SAND, SILICA
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

SCRATCH TESTS
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Scratching Electrodes Repassivation Kinetics, 3-149

SEA AQUEOUS
Biofilm Effects on SS Corrosion in Seawater, 10-717
Cathodic Protection Parameters Influence on Calcare, 12-887
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Fatigue Crack Electrochemical Measurement, 9-599
H_2S in Seawater vs CMn Structural Steel, 7-443
Impedance, DC Tests of Bacterial Attack, 12-869
Microfouling of Metals in Polluted Seawater, 7-423
pH, Potential of Steel Cracks in Seawater, 1- 55
SS Crevice Attack in 25 to 40 C Seawater, 4-194
SS Localized, SCC Attack Prediction Control, 2- 88
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

SEALANTS
Variables' Influence on Electrchemical Tests, 12-856

SEGREGATION, GRAIN
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Austenitic SS Sensitization Measurement Prediction, 7-427
Grain Boundary Influence on IGSCC, 6-364
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC — Sensitized SS in H_2O + Cl + S, 50 to 200 C, 8-560
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Strauss Test Results on P, S-Doped 304 SS, 12-881

SEGREGATIONS, METAL INTERNAL
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
P Distribution During Tempering of AISI 4130 Steel, 7-465

SENSITIZATION
Austenitic SS Sensitization Measurement Prediction, 7-427
Grain Boundary Influence on IGSCC, 6-364
Microstructure Influence on Ni Alloy Cracking, 11-838
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328
Temp, Low Contamination vs AISI 304 SCC, 11-791

SHEAR STRESS TESTING
Rotating Electrode Prediction of Attack, 1- 42

SHURRIES
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

SILICA - (NOT GLASS)
Electrochemical Estimation — Grinding Media, 11-837
H Cracking of FeSi Single Crystals, 1- 14

SILICATES
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875

SILICON
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699

SILICON CARBIDE
Processing Methods Influence on SiCAl Composites, 10-680

SINTERED MIXTURES
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

SLIP PLANES
Alloy 600 Fatigue in High-Salinity Brine, 12-905
H Cracking of FeSi Single Crystals, 1- 14
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
SCC Al-Li Alloy 8090 in NaCl, 8-527
Zr Susceptibility to SCC in 9% HNO_3, 10-745

SLOW STRAIN RATE TESTS
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Grain Boundary Influence on IGSCC, 6-364
H Absorption — High-Strength Steel in NaCl, 3-176
H Cracking of FeSi Single Crystals, 1- 14
H Induced Cracking of SS in High-Temperature Water, 2-124
Ni Influence on HSC of Low-Alloy Steels, 11-776
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC Inconel Welds in High-Temperature H_2O + H_2SO_4, 4-233
SCC of Rotor Steels in Simulated Condensers, 2- 79
SCC of Steel in High-Temperature Water, 5-290
SCC — Sensitized SS in H_2O + Cl + S, 50 to 200 C, 8-560
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
SS Localized, SCC Attack Prediction Control, 2- 88
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Zr Susceptibility to SCC in 9% HNO_3, 10-745

SLUDGE
Measuring Erosion-Corrosion under Grinding, 4-221

SODIUM CARBONATE
SCC of Rotor Steels in Simulated Condensers, 2- 79
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615

SODIUM CHLORIDE
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
Environment Influence on SCC of Al 7000 Alloy, 10-685
Galvanic Cell Measurement of Al, Steel A, 12-900
H Absorption — High-Strength Steel in NaCl, 3-176
H Influence on Pitting of Passive Ni in Cl, 10-696
High-Temperature Attack in AISI 304 SS Crevices, 4-204
IGSCC AlZnMg Alloys, 4-231
Mg SCC, Liquid Metal Embrittlement, 2-113
Mo-Alloying Influence on 12% Cr Steel, 9-664
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Polarization, Fatigue of FeAlMn in NaCl, 11-810
Spectrometry of Fe vs Sodium Chloride, 3-131
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Test Equipment Shape Influence on Cu vs NaCl, 11-768
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Variables' Influence on Electrchemical Tests, 12-856
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

SODIUM CHROMATE
Environment Influence on SCC of Al 7000 Alloy, 10-685

SODIUM HYDROXIDE
Alloy 600 Grain Margin Influence on IGSCC 5-314
Anodic Behavior of Ti in Aqueous Solution, 10-705
Defect Concentration Effects in Hot H_2O, 6-334
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Fe Corrosion Chemistry in Boiler System, 3-154
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
SCC of Rotor Steels in Simulated Condensers, 2- 79
SCC of Steel in High-Temperature Water, 5-290

SODIUM
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Anodic Behavior of Ti in Aqueous Solution, 10-705
Characterization of Crack Tip Electrochemistry, 9-623
Corroding Area Calculated by Pseudocapacitance, 8-533
H Influence on Pitting of Passive Ni in Cl, 10-696
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Fe vs Molten Sulfates, 10-724
Mg SCC, Liquid Metal Embrittlement, 2-113
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo-Alloying Influence on 12% Cr Steel, 9-664
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Radiation Influence on Steel IGA, 9-632
Temp, Low Contamination vs AISI 304 SCC, 11-791

SOILS, TESTING
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581

SOLUBILITY
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875

SOUND INSULATION
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502

SPALLING
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

STACKING FAULTS
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC of Rotor Steels in Simulated Condensers, 2- 79

STEAM
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468
Defect Concentration Effects in Hot H_2O, 6-334
Grain Boundary Influence on IGSCC, 6-364
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
SCC of Rotor Steels in Simulated Condensers, 2- 79

STEEL REINFORCED CONCRETE
Cl Concentration Influence on Steel in Concrete, 7-489
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
On-Site Polarization Tests of Steel in Concrete, 10-761
Rebar Corrosion Evaluation by Spectroscopy, 1- 2

STEELS MARAGING, NICKEL-COBALT-MOLYBDENUM-TITANIUM-ALUMINUM
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517

STEELS, CARBON
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Oilfield Fluids vs Alloy Steels, 12-916

STEELS, CHROMIUM-NICKEL, 304, 304L
Strauss Test Results on P, S-Doped 304 SS, 12-881

STEELS, CHROMIUM, MARTENSITIC, 403-414
Oilfield Fluids vs Alloy Steels, 12-916

STEELS, NI, CR, INCONEL 600
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891

STEELS, NI, CR, INCONEL 625 HAYNES
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891

STEELS, NICKEL
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891

STEELS, OTHER
Boundary Element Analysis of Potential Current D, 12-926
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891

STEELS, CARBON, HIGH STRENGTH
Electrochemical Estimation — Grinding Media, 11-837
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
H Absorption — High-Strength Steel in NaCl, 3-176
Measuring Erosion-Corrosion under Grinding, 4-221
Ni Influence on HSC of Low-Alloy Steels, 11-776
pH, Potential of Steel Cracks in Seawater, 1- 55

STEELS WEATHERING
Fatigue Crack Electrochemical Measurement, 9-599
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

STEELS, CAST CHROMIUM-NICKEL
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, CHROMIUM-NICKEL
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Grain Boundary Influence on IGSCC, 6-364
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-325
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, $3O_2$B, 303, 303SE
Electrochemical Estimation — Grinding Media, 11-837

STEELS, 304, 304L
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Austenitic SS Sensitization Measurement Prediction, 7-427
Characterization of Crack Tip Electrochemistry, 9-623
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Grain Boundary Influence on IGSCC, 6-364
H Induced Cracking of SS in High-Temperature Water, 2-124
High-Temperature Attack in AISI 304 SS Crevices, 4-204
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC — Sensitized SS in H_2O + Cl + S, 50 to 200 C, 8-560
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699
SS Localized, SCC Attack Prediction Control, 2- 88
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328
Sulfate-Reducing Bacteria vs SS, 9-671
Surfactants vs AISI 304L Pitting, 5-299
Temp, Low Contamination vs AISI 304 SCC, 11-791

STEELS, 305, 309
CrNi Steel vs Formic Acid, 3-136
SCC Inconel Welds in High-Temperature H_2O + H_2SO_4, 4-239

STEELS, 310, 310S
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, 314
Microfouling of Metals in Polluted Seawater, 7-423

STEELS, 316, 316L
AC Impedance Prediction of Corrosion Rate, 5-280
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Austenitic SS Sensitization Measurement Prediction, 7-427
Biofilm Effects on SS Corrosion in Seawater, 10-717
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
H Induced Cracking of SS in High-Temperature Water, 2-124
N Implantation vs Oxidation AISI 316, 9-611
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
SS Localized, SCC Attack Prediction Control, 2- 88
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328
Sulfate-Reducing Bacteria vs SS, 9-671

STEELS, 321, 347, 348
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
SCC and H Induced Cracking of SS, 1- 50

STEELS, CHROMIUM, FERRITIC
Defect Concentration Effects in Hot H_2O, 6-334
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Load Line Displacement Influence: 422 Cracks, 10-756
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
SS Crevice Attack in 25 to 40 C Seawater, 4-194

STEELS, CHROMIUM, FERRITIC, 430 F, FSE
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386

STEELS, MARTENSITIC
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Sulfate-Reducing Bacteria vs SS, 9-671

STEELS, CHROMIUM-NICKEL-IRON, PRECIPITATION HARDENED
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404

STEELS, NICKEL-CHROMIUM
Grain Boundary Influence on IGSCC, 6-364

STEELS, ALLOY 600
Alloy 600 Grain Margin Influence on IGSCC 5-314
H Induced Cracking of SS in High-Temperature Water, 2-124
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
SCC Inconel Welds in High-Temperature H_2O + H_2SO_4, 4-239
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, ALLOY 601
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, ALLOY 625
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, ALLOY X-782
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC Inconel Welds in High-Temperature H_2O + H_2SO_4, 4-239

STEELS, NICKEL-CHROMIUM, OTHER
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Microstructure Influence on Ni Alloy Cracking, 11-838
SCC Inconel Welds in High-Temperature H_2O + H_2SO_4, 4-239
900 C Oxychloridation of CrNi + ArCo Mo, 8-544

STEELS, OTHER
Austenitic SS Sensitization Measurement Prediction, 7-427
Bacterial Influence on Cathodically Protected SS, 5-270
CrNi Steel vs Formic Acid, 3-136
DC Pulse Measurement of Fresh Water Systems, 10-750
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
H Induced Cracking of SS in High-Temperature Water, 2-124
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
SCC and H Induced Cracking of SS, 1- 50
Scratching Electrodes Repassivation Kinetics, 3-149
SS Crevice Attack in 25 to 40 C Seawater, 4-194
SS Localized, SCC Attack Prediction Control, 2- 88
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 6-328
Sulfate-Reducing Bacteria vs SS, 9-671

STEREOSCOPIC TESTING
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782

STILLS CHEMICAL
Analysis of C Steel vs Phenol + Amine Hydrochlorides, 7-468

STRAIN LAB TESTING
Characterization of Crack Tip Electrochemistry, 9-623
Grain Boundary Influence on IGSCC, 6-364
Microstructure Influence on Ni Alloy Cracking, 11-838

STRAUSS TEST
Silicon's Influence on Intergranular Attack on 18-8 SS, 10-699

STRESS CORROSION CRACKING
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 690 Carbide Precipitation vs SCC Behavior, 5-288
Al Powder Alloys SCC Tip Chemistry Analysis, 3-165
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770

Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Environment Influence on SCC of Al 7000 Alloy, 10-685
Grain Boundary Influence on IGSCC, 6-364
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Mg SCC, Liquid Metal Embrittlement, 2-113
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Microstructure Influence on Ni Alloy Cracking, 11-838
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73
SCC in 182 Welds in 600 vs 288 C H_2O +O_2, 6-376
SCC Inconel Welds in High-Temperature $H_2O+H_2SO_4$, 4-239
SCC of Rotor Steels in Simulated Condensers, 2- 79
SCC of Steel in High-Temperature Water, 5-290
SCC — Sensitized SS in $H_2O+Cl+S$, 50 to 200 C, 8-560
Si Alloying of 18Cr-8Ni in Dilute H_2SO_4, 10-711
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
SS Localized, SCC Attack Prediction Control, 2- 88
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Variables' Influence on Electrchemical Tests, 12-856
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435
Zr Susceptibility to SCC in 9% HNO_3, 10-745

STRESS TESTING
H Attack on Hydroprocessors vs Time, 2-103
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Temp, Low Contamination vs AISI 304 SCC, 11-791
Zr Susceptibility to SCC in 9% HNO_3, 10-745

STRESSES
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Austenitic SS Sensitization Measurement Prediction, 7-427
Characterization of Crack Tip Electrochemistry, 9-623
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
H Absorption — High-Strength Steel in NaCl, 3-176
H Cracking of FeSi Single Crystals, 1- 14
IGSCC AlZnMg Alloys, 4-231
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Ni Influence on HSC of Low-Alloy Steels, 11-776
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
Polarization, Fatigue of FeAlMn in NaCl, 11-810
SCC and H Induced Cracking of SS, 1- 50
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
SS Localized, SCC Attack Prediction Control, 2- 88
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Zr Susceptibility to SCC in 9% HNO_3, 10-745

SULFATES
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Alloy 600 Grain Margin Influence on IGSCC 5-314
Anodic Behavior of Ti in Aqueous Solution, 10-705
Characterization of Crack Tip Electrochemistry, 9-623
Corroding Area Calculated by Pseudocapacitance, 8-533
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Defect Concentration Effects in Hot H_2O, 6-334
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
H Influence on Pitting of Passive Ni in Cl, 10-696
High-Temperature Attack in AISI 304 SS Crevices, 4-204
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Fe Corrosion Chemistry in Boiler System, 3-154
Fe vs Molten Sulfates, 10-724
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo-Alloying Influence on 12% Cr Steel, 9-664
N Compounds Inhibitors of Fe vs Na_2SO_4 Solution, 6-322
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Nonsensitized 316 SS vs 288 C Water + O_2, 7-450
SCC Inconel Welds in High-Temperature $H_2O+H_2SO_4$, 4-239
Scratching Electrodes Repassivation Kinetics, 3-149
Sulfate-Reducing Bacteria vs SS, 9-671
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Temp, Low Contamination vs AISI 304 SCC, 11-791

SULFIDES
Characterization of Crack Tip Electrochemistry, 9-623
Electrochemical Estimation — Grinding Media, 11-837
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Ni Local Attack in Neutral Sodium Sulfate, 6-360
Ni-Base Alloys vs SO_2, NaCl Slurries, 6-404
Oilfield Fluids vs Alloy Steels, 12-916
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
SCC — Sensitized SS in $H_2O+Cl+S$, 50 to 200 C, 8-560
SS Crevice Attack in 25 to 40 C Seawater, 4-194

SULFUR
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Electrochemical Study of H_3PO_4 Films on Al, 6-354
Electrochemical Tests of SS vs Sulfate Bacteria, 6-386
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
Microfouling of Metals in Polluted Seawater, 7-423
Ni Local Attack in Neutral Sodium Sulfate, 6-360
SCC — Sensitized SS in $H_2O+Cl+S$, 50 to 200 C, 8-560
Strauss Test Results on P, S-Doped 304 SS, 12-881
Sulfate-Reducing Bacteria vs SS, 9-671
Temp, Low Contamination vs AISI 304 SCC, 11-791

SULFURIC ACID
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
Anodic Behavior of Ti in Aqueous Solution, 10-705
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Impurities Influence on IGSCC of SS in High-Temperature H_2O, 2- 66
Mo-Alloying Influence on 12% Cr Steel, 9-664
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
SCC in 182 Welds in 600 vs 288 C H_2O +O_2, 6-376
SCC Inconel Welds in High-Temperature $H_2O+H_2SO_4$, 4-239
Scratching Electrodes Repassivation Kinetics, 3-149

SURFACE EFFECTS
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Impedance, DC Tests of Bacterial Attack, 12-869
Variables' Influence on Electrchemical Tests, 12-856

SURFACE PREPARATION
CuNi Piling Sheaths—Two-Year Study Results, 7-478
Evaluation of Low-Slump-Concrete Bridge Deck Repassivation, 6-397
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Surface Pretreatment of Al Influence on Pits, 7-414
Variables' Influence on Electrchemical Tests, 12-856

SURFACT-ANTS-IVES
α-Alkenylphenone Inhibitor Properties, 9-590
Surfactants vs AISI 304L Pitting, 5-299

TANKS, METAL
H Attack on Hydroprocessors vs Time, 2-103
Radiation Influence on Steel IGA, 9-632

TEMPERATURE
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
α-Alkenylphenone Inhibitor Properties, 9-590
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Cathodic Protection Parameters Influence on Calcare, 12-887
Characterization of Crack Tip Electrochemistry, 9-623
Cu, Fe, CuFe+H_2O Oxides Precip in BWR Reactor, 12-875
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
CrNi Steel vs Formic Acid, 3-136
Environmental Factors Influence H_2 Attack on Line Pipe, 10-738
H Attack on Hydroprocessors vs Time, 2-103
H_2 Evolution from Surfaces under Cathodic Protection, 8-572
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Microstructure Influence on Ni Alloy Cracking, 11-838
N Implantation vs Oxidation AISI 316, 9-611
N Influence on Duplex Steel Simulated Weldments, 5-305
Oilfield Fluids vs Alloy Steels, 12-916
Pitting Influence Cl Concentration, Temperature on AISI 304 SS, 10-732
SCC of Steel in High-Temperature Water, 5-290
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Spectrometry of Fe vs Sodium Chloride, 3-131
SS Crevice Attack in 25 to 40 C Seawater, 4-194
Strauss Test Results on P, S-Doped 304 SS, 12-881
Temperature + Mg Ions Influence on Calcareous Deposits, 9-615
Temp, Low Contamination vs AISI 304 SCC, 11-791
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Vibratory Amp Influence on Erosion-Corrosion, 2- 97
Zn, ZnAl Reactions vs 3% NaCl, 1- 62
Zinc Passivation in Oxalate Solution, 10-691
Zr Susceptibility to SCC in 9% HNO_3, 10-745

TEMPERATURE, -100 TO -20, C
Spectrometry of Fe vs Sodium Chloride, 3-131

TENSILE TESTS
Crevice Influence on SCC of Fe-29Ni-17Co, 8-517
Hydrogen Degradation of FeMnAl Alloys, 4-209
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782
Ni Local Attack in Neutral Sodium Sulfate, 6-360
SCC in 182 Welds in 600 vs 288 C H_2O +O_2, 6-376

TENSILE STRESSES
Microstuctural and Microdeformational Effects on IGSCC — Alloy 600 vs Steel, 11-782

TESTING
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Stress Corrosion of AlCuLi 2090 in Na, 12-932
Variables' Influence on Electrchemical Tests, 12-856

TETRATHIONATE ENVIRONMENTS
Alloy 600 Fatigue in High-Salinity Brine, 12-905

THERMODYNAMICS
α-Alkenylphenone Inhibitor Properties, 9-590
Characterization of Crack Tip Electrochemistry, 9-623
Cu, Fe, CuFe+H_2O Oxides Precip in BWR Reactor, 12-875
Fatigue Crack Electrochemical Measurement, 9-589
Incorporating Organic Agents in Diagrams, 9-606
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Variables' Influence on Electrchemical Tests, 12-856

THICKNESS
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461
Stress Corrosion of AlCuLi 2090 in Na, 12-932

THIN FILM ELECTROLYTES
Cu Dendrite Growth in Bulk, Thin Layer Electrolyte, 9-644

THIN LAYER ACTIVATION TESTS
N-Base, Organic Inhibitors for Corroded Steel, 8-586

THIOCYANATES
Coal Gas Liquid SCC — Mild, Low-Alloy Steel, 11-770

THIOLS INHIBITORS
Surfactants vs AISI 304L Pitting, 5-299

THIOSULFATES
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Ni in SS vs Pitting in Cl, Thiosulfate, 5-274
SCC — Sensitized SS in $H_2O+Cl+S$, 50 to 200 C, 8-560

TIDAL ZONE
CuNi Piling Sheaths—Two-Year Study Results, 7-478

TIME
AC Impedance Prediction of Corrosion Rate, 5-280
Concentration Cell Influence on Crevices, Pits, SCC, 8-539
Crevice Attack on Ni-Base Alloys in Cl, S, 12-891
Galvanic Cell Measurement of Al, Steel A, 12-900
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
H Influence on Pitting of Passive Ni in Cl, 10-696
Load Line Displacement Influence: 422 Cracks, 10-756
Microfouling of Metals in Polluted Seawater, 7-423

Ni Influence on HSC of Low-Alloy Steels, 11-776
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800
Pitting of Anodic Oxide Film on AISI 304, 316, 1- 29
Processing Methods Influence on SiCAl Composites, 10-680
SCC of Rotor Steels in Simulated Condensers, 2- 79
Slow Strain Rate Tests in High-Pressure H_2S, 12-920
Spectrometry of Fe vs Sodium Chloride, 3-131
Variables' Influence on Electrchemical Tests, 12-856
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

TIME, TESTING
IGSCC AlZnMg Alloys, 4-231
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
Surface Pretreatment of Al Influence on Pits, 7-414
Vibratory Amp Influence on Erosion-Corrosion, 2- 97

TIN
Grain Boundary Influence on IGSCC, 6-364
Defect Concentration Effects in Hot H_2O, 6-334

TITANIUM
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Microfouling of Metals in Polluted Seawater, 7-423
Microstructure Influence on Ni Alloy Cracking, 11-838
Mo-Alloying Influence on 12% Cr Steel, 9-664
Precipitation-Hardened Alloys vs Hydrogen Sulfide, 3-169
SCC in X-750 in High-Temperature Pure Water-Influence Heat Treat, Time, 2- 73

TRANSGRANULAR CRACKING
Alloy 600 Fatigue in High-Salinity Brine, 12-905
Hydrogen Degradation of FeMnAl Alloys, 4-209
Mg SCC, Liquid Metal Embrittlement, 2-113
P Distribution During Tempering of AISI 4130 Steel, 7-465
SCC Al-Li Alloy 8090 in NaCl, 8-527
SCC of Rotor Steels in Simulated Condensers, 2- 79
SS Localized, SCC Attack Prediction Control, 2- 88
Temp, Low Contamination vs AISI 304 SCC, 11-791

TRANSPASSIVITY
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Spectroscopic Analysis of 18Cr SS Metal-O_2 Bond, 7-461

TUBERCULATION
Sulfate-Reducing Bacteria vs SS, 9-671

TUNGSTEN
WNiFe Alloys' SCC in 3.5% NaCl Solution, 7-435

TURBULENCE
Rotating Electrode Prediction of Attack, 1- 42

UNDERGROUND ENVIRONMENTS
Corroding Area Calculated by Pseudocapacitance, 8-533
Radiation Influence on Steel IGA, 9-632

UNDERWATER CATHODIC PROTECTION
Boundary Element Analysis of Potential Current D, 12-926

URANIUM
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Metal Coating Defects vs Base Metal Attack, 1- 36
Microfouling of Metals in Polluted Seawater, 7-423

VELOCITY
Cathodic Protection Parameters Influence on Calcare, 12-887
Cu, Fe, CuFe + H_2O Oxides Precip in BWR Reactor, 12-875
Environment Influence on SCC of Al 7000 Alloy, 10-685
Impedance, DC Tests of Bacterial Attack, 12-869
Variables' Influence on Electrchemical Tests, 12-856

VIBRATING OR ROTATING ELECTRODES
Hydrodynamic Test Equipment for High-Temperature H_2O, 3-186
Rotating Electrode Prediction of Attack, 1- 42

VIBRATION
Amp influence on Erosion-Corrosion, 2- 97

VITREOUS MATERIALS
FeNiB Glasses Influence by Mo, Si Alloying, 5-263

VOLTAGE EFFECTS
Cathodic Protection Parameters Influence on Calcare, 12-887
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142

VOLTAMETRIC TESTS
Polarized C Steel in High-Temperature Alkaline Sulfide, 3-142
Rebar Corrosion Evaluation by Spectroscopy, 1- 2
Test Equipment Shape Influence on Cu vs NaCl, 11-768

WASTE DISPOSAL
Local Attack on NiMo Alloys in Hot NaCl, 4-199
Radiation Influence on Steel IGA, 9-632

WATER
AA 7075 vs *Cladosporium resinae* Contamination, 9-638
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
AC Impedance Prediction of Corrosion Rate, 5-280
CrNi Steel vs Formic Acid, 3-136
Cold Work Influence on AISI 304 SCC in High-Temperature H_2O-O, 1- 21
Defect Concentration Effects in Hot H_2O, 6-334
Electrochemical Impedance Test for Cathodic Protection in Concrete, 8-581
Electrode to Measure Hydrocarbon-H_2O Mixture, 9-658
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Grain Boundary Influence on IGSCC, 6-364
Particles, CO_2 in Fluids vs C and 13Cr Steel, 11-800

WEAR
Electrochemical Estimation — Grinding Media, 11-837
Measuring Erosion-Corrosion under Grinding, 4-221
N Implantation vs Oxidation AISI 316, 9-611

WEIGHT LOSS
Galvanic Cell Measurement of Al, Steel A, 12-900
Strauss Test Results on P, S-Doped 304 SS, 12-881

WELDING
AISI 304 IGSCC in Hot H_2O with Organic Acids, 6-345
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Austenitic SS Sensitization Measurement Prediction, 7-427
CuNi Piling Sheaths—Two-Year Study Results, 7-478
H_2S in Seawater vs CMn Structural Steel, 7-443
N Influence on Duplex Steel Simulated Weldments, 5-305
Ni Influence on HSC of Low-Alloy Steels, 11-776
SCC in 182 Welds in 600 vs 288 C H_2O + O_2, 6-376
SCC Inconel Welds in High-Temperature H_2O + H_2SO_4, 4-239
SCC of Steel in High-Temperature Water, 5-290

WHITNEY AWARD LECTURE
Variables' Influence on Electrchemical Tests, 12-856

X-RAY TESTING
AISI 316L Pitting vs Weld Heat, Microstructure, 8-511
Alloy 400 vs Fe_3O_4 Films in EDTA Solution, 11-818
FeNiB Glasses Influence by Mo, Si Alloying, 5-263
Flouride Inhibitors of AISI 321 vs HNO_3-N_2O_4-F Mixture, 1- 7
Grain Boundary Influence on IGSCC, 6-364
Microfouling of Metals in Polluted Seawater, 7-423
Mo Influence in 17Cr-13Ni SS vs O-Phosphoric A, 4-214
N Implantation vs Oxidation AISI 316, 9-611
STEM-EDS, EPR Tests of Austenitic SS Sensitization, 8-328
Sulfate-Reducing Bacteria vs SS, 9-671
Surface Pretreatment of Al Influence on Pits, 7-414
Time-Temperature-Transformation Diagram—Alloy 925, 11-827
Weathering Steel Rust Layer Analysis on Bridge Spans, 7-483

ZINC
Al Alloy Air Battery Corrosion Studies, 9-652
Galvanic Effects of Depleted U-Ti vs Al, Mg, 4340 Steel, 8-502
Zinc Passivation in Oxalate Solution, 10-691
Zn, ZnAl Reactions vs 3% NaCl, 1- 62

ZIRCONIUM
Zr Susceptibility to SCC in 9% HNO_3, 10-745
